Report

I. Introduction

This is 3 vacant residential single-family home properties. My assignment is to evaluate all trees and palms on site for health and condition.

II. Property Involved

The property involved is known as Delray Ridge, Delray Beach, FL. I arrived on site 11- 4-6-2020. The trees/palms are located throughout the property.

III. Data Collection

The property/trees were evaluated by site visit to determine environmental conditions, species, size (DBH and height) condition as a percentage and pictures.

IV. Limiting Conditions

This “Arboriculture Report” includes only the listed trees, landscape conditions in the immediate area where the tree is located, and conditions caused by or attributable to the trees on this property. We did not evaluate and make no evaluation or conclusions regarding any other part of the landscape or other items of this property.

Limits of the Assignment

1. This report is not intended as and does not represent legal advice and should not be relied upon to take the place of such advice.
2. This report is limited to documenting the condition of the tree on the dates given. Care has been taken to obtain all information from reliable sources. All data has been verified insofar as possible; however, the consultant can neither guarantee nor be responsible for the accuracy of information provided by others.
3. Loss or alteration of any part of this report invalidates the entire report.
4. Sketches and photographs used in this report are intended as visual aids only and are not necessarily to scale.

V. Conclusions and Recommendations

Please see attached survey with tree locations, excel spreadsheet, and pictures. All trees accessible have been tagged with numbers that correspond with report and survey.
