City of Delray Beach, Florida

Capital Improvement Project Request

Fiscal Year 2024 - 2028

Project Title: Tree Planting
Project Location: Citywide
Department: City Manager/ Sustainability
Contact Person: Kent Edwards
Project Status: ☐ New Project ☒ Project Continuation ☐ Annual Project
Project Origination Date: 2019

Project Description

A Tree Canopy Assessment was performed in May 2019. The report recommended setting a goal of planting 10,000 trees over a 5-year period to raise city-wide tree canopy cover to 28%. The first year of this project was initiated in 2020. Year 2 of the project will finish in June 2023. The Agreement allows extensions for Years 3 to 5 Plantings. The current CIP Project request is for Years 3 through 5 Planting.

Project Justification / Relation to Other Projects

The City Commission accepted the recommendations of the Tree Canopy Assessment report, including setting a goal of planting 10,000 trees to raise the tree canopy coverage to 28% overall for the city. The project furthers comprehensive plan Objective CSR 8.4, regarding Green Infrastructure.

Capital Improvement Project Request

Fiscal Year 2024 - 2028

Project Title: Parking Technology Improvements
Project Location: Downtown/Beach
Department: Public Works
Contact Person: Michael Karali
Project Status: ☒ New Project ☐ Project Continuation ☐ Annual Project
Project Origination Date: 10/1/2023

Project Description

Purchase and install parking technology in the Downtown and Beach districts.

Project Justification / Relation to Other Projects

In support of the Parking & Curbside Management Master Plan, adopted by City Commission on September 9, 2022, this project involves the purchase and installation of parking sensors and License Plate Reader (LPR) cameras in surface lots, on-street parking, and parking garages within the Downtown and Beach districts. These products will require a subscription to maintain and allow residents to utilize the website to view available parking spaces. The cost includes new parking signs to provide space numbering at each surface lot.

Project Title: Pavilion Replacement
Project Location: Various Locations
Department: Parks & Recreation
Contact Person: Sam Metott
Project Status: ☐ New Project ☐ Project Continuation ☒ Annual Project
Project Origination Date: Annual Project

Project Description

Replacement of various park pavilions.

Project Justification / Relation to Other Projects

Pavilions throughout the City's park system are in need of repair and replacement. The pavilions are over 15 years old and past their life expectancy. Pavilions are revenue generating structures. Loss of use is loss of revenue.

Project Location: Various Locations
Department: Parks & Recreation
Contact Person: Sam Metott
Project Status: ☐ New Project ☒ Project Continuation ☐ Annual Project
Project Origination Date: 10/1/2023

Project Description

Multi-use Restroom Trailer

Project Justification / Relation to Other Projects

Parks & Recreation is looking to purchase a restroom trailer to be used for all department events. We are currently spending in excess of \$20,000 annually to rent trailer for events hosted throughout the City. This will allow those annual funds to be spent in more beneficial ways. This trailer will be used for all Parks & Recreation sponsored events, in addition to assisting emergency services in times of need.

Project Title: Andrews Avenue Safety Improvements

Project Location: Atlantic Avenue to Vista Del Mar Drive

Department: Public Works

Contact Person: Jason Kaufman

Project Status: ☐ New Project ☒ Project Continuation ☐ Annual Project

Project Origination Date: October 2022

Project Description

Design and construction of safety improvements to ensure sidewalk connectivity and ADA compliance while maintaining parking and improving safety for all road users. The design approach will also consider possible traffic calming measures. City Project Number 23-005.

Project Justification / Relation to Other Projects

Beginning at Vista Del Mar Drive, the southern portion of Andrews Avenue quickly turns from single family residential lots to multi-family residential lots and then to commercial as it approaches Atlantic Avenue. The community has gathered extensive support for there to be safety improvements made within this segment of Andrews Avenue.

City of Delray Beach, Florida

Capital Improvement Project Request

Fiscal Year 2024 - 2028

Project Title: Public ROW ADA Improvements
Project Location: Citywide
Department: Public Works
Contact Person: Jason Kaufman
Project Status: ☐ New Project ☐ Project Continuation ☒ Annual Project
Project Origination Date: Annual Project

Project Description

The scope of work includes continuation of the City's Self-Evaluation & Transition Plan to address ADA deficiencies within City right-of-way, including the addition of missing sidewalk segments. Using Transition Plan I, four separate design and construction packages were developed to address these deficiencies. Package 1 is complete, package 2 is under construction, package 3 is on the shelf ready for construction, and package 4 ready for design. Remaining transition plans are in planning the phase.

Project Justification / Relation to Other Projects

The Americans with Disabilities Act (ADA) is a civil rights law that mandates equal opportunity for individuals with disabilities. Part of the Act requires government entities to meet mobility requirements. This project will improve the City's right-of-way to be in compliance with ADA rules and regulations.

City of Delray Beach, Florida

Capital Improvement Project Request

Fiscal Year 2024 - 2028

Project Title: Building Division Reconfiguration
Project Location: Development Services Building
Department: Public Works
Contact Person: Jason Kaufman
Project Status: ☒ New Project ☐ Project Continuation ☐ Annual Project
Project Origination Date: 10/1/2023

Project Description

Redistribute the current space to better service Development Services and Neighborhood & Community Services departments, utilizing system furniture to create a more efficient arrangement that can accommodate large monitors and additional staff. Reconfigure the lobby to improve security, accommodate public kiosks, and capture more space for staff use.

Project Justification / Relation to Other Projects

As the City transitions to electronic plan review, public kiosks will provide a necessary service for customers, especially residents. Additionally, the current lobby and plan review layouts are inefficient, do not serve staff well and is not well suited for the necessary e-plan review system. As growth continues to occur in the City at a significant pace, more staff has to utilize limited space. More efficient furniture and space planning is necessary.

Project Title: Dune Management
Project Location: Municipal Beach
Department: Public Works
Contact Person: Cynthia Buisson
Project Status: ☐ New Project ☐ Project Continuation ☒ Annual Project
Project Origination Date: Summer 2020

Project Description

This project provides active management of the various dune management requirements, including dune trimming, invasive exotic species removal, strand zone pruning, planting specifications, fertilization, irrigation, survival criteria and replanting.

Project Justification / Relation to Other Projects

Coastal dunes serve a number of functions, including trapping and stabilizing windblown sand, keeping sand off the street and on the beach. The dune also provides a protective storm buffer reducing flooding and wave damage all while providing a habitat for over two hundred plant and animal species. The City's coastal dune system is almost entirely man-made and must be actively managed to balance engineering, recreational, aesthetic and maintenance needs.

Project Title: Sea Turtle Nest Monitoring
Project Location: Municipal Beach
Department: Public Works
Contact Person: Cynthia Buisson
Project Status: ☐ New Project ☐ Project Continuation ☒ Annual Project
Project Origination Date: 1984

Project Description

Sea turtle nest monitoring including daily nesting surveys, monthly lighting surveys, several public outreach events (nest excavations), and reporting to the Florida Wildlife Commission.

Project Justification / Relation to Other Projects

The Federal and State permits for beach nourishment require annual sea turtle nesting monitoring on the beach during sea turtle nesting season from March 1 to October 31. The City's Marine Turtle Conservation program began in 1984 and includes annual sea turtle nest monitoring of the City's 2.8-mile-long beach area.

Project Title: Beach Nourishment Monitoring
Project Location: Municipal Beach
Department: Public Works
Contact Person: Cynthia Buisson
Project Status: ☐ New Project ☐ Project Continuation ☒ Annual Project
Project Origination Date: Summer 2020

Project Description

Topographic (onshore) and bathymetric (offshore) surveys of the City's beach are conducted annually each summer. The monitoring data is used to assess, with quantitative data, the performance of the beach nourishment projects.

Project Justification / Relation to Other Projects

The City has one of the most successful beach maintenance and preservation programs in the United States. Since 1973, the City has performed these beach monitoring / surveying activities annually to comply with permit requirements and track performance of the beach system. The monitoring data provides the City, Florida Department of Environmental Protection (FDEP), and United States Army Corps of Engineers (USACE) information necessary to continue planning for the next renourishment project and evaluate beach performance.

CRA - Pompey Park Recreational Center Improvements

Project Location:

Pompey Park

Department:

Public Works

Contact Person:

Kevin Matthews (16-102)

Project Status:

☐ New Project ☒ Project Continuation ☐ Annual Project

Project Origination Date:

October 2018

Project Description

Construction of new recreation building and associated site improvements. Site improvements include new and refurbished playing fields, additional parking, sports and parking lot lighting, landscaping, family and competition pools, playgrounds, and fitness equipment along with new basketball courts. Additional on-site improvements will provide off-site connectivity for pedestrians and bicyclists.

Project Justification / Relation to Other Projects

Pompey Park is sits on approx. 14-acres, bounded by NW 13th Ave, NW 2nd St, NW 10th Ave, and NW 3rd St. The park has an existing one-story, 22,823 square foot community center building, with associated parking, playing fields, playgrounds, a pool, and historic tennis courts. The building, constructed with Federal Funds in the 1950's, serves over 150,000 people each year and more than 40 organizations and civic groups utilize it on a monthly basis. The facility is in dire need of renovation and expansion. The City wishes to redevelop the park to accommodate the current programming needs of the community. The design is based on the Master Plan for Pompey Park, completed in 2019.

Project Origination Date:

October 2021

Project Description

Northwest Neighborhood infrastructure improvements including upgrades to water, sewer, stormwater, roadway, sidewalks, traffic calming and lighting.

Project Justification / Relation to Other Projects

The primary goal of the project is to improve the roadways/alleyways, and to upgrade the underground utilities, stormwater, and drainage. This project will also upgrade the lighting to LED on the streets resulting in improved safety in the area. The project will introduce traffic calming to slow down vehicular traffic and facilitate on-street parking. This project is anticipated to have a minimum service life of 25 years.

City of Delray Beach, Florida
Capital Improvement Project Request
Fiscal Year 2024 - 2028

Project Title: CRA - Artists Alley Drainage Improvement

Project Location: Artists Alley

Department: Public Works

Contact Person: Begona Krane

Project Status: ☒ New Project ☐ Project Continuation ☐ Annual Project

Project Origination Date: 10/1/2023

Project Description

Install new drainage system within Artists Alley and connect to existing drainage system at the intersection of NE 3rd Street and NE 3rd Avenue. Work would include installation of catch basins, pipe, and manholes, along with restoration to existing pavement and pavers.

Project Justification / Relation to Other Projects

This alley has flooding issues and the situation is only going to worsen and become more problematic as the Arts District continues to grow. An existing exfiltration trench intended to infiltrate runoff into the ground was constructed over 40 years ago, is not connected to any City drainage system and is suspected to be compromised. City crews maintain the system by periodically pumping the drain. With the proposed improvements, runoff will be better managed and conveyed to an existing City drainage system which will reduce the frequency and intensity of flooding.

Project Status: ☐ New Project ☒ Project Continuation ☐ Annual Project
Project Origination Date: 10/1/2021

Project Description

Replacement of existing restroom facility at Currie Commons Park.

Project Justification / Relation to Other Projects

The restroom and concession building were unusable and unsafe. The existing facilities are scheduled for demolition end of FY23. A replacement restroom facility is needed to support the patrons utilizing the park's amenities, which includes a playground for ages 0-15 years of age, baseball and multiuse fields, and the walking trail.

Project Status:

☐ New Project ☒ Project Continuation ☐ Annual Project

Project Origination Date:

October 2021

Project Description

A Complete Streets project intended to improve safety and the experience for all road users, including motorists, cyclists, pedestrians, and individuals with disabilities. Improvements include installation of ADA compliant shared use paths and sidewalks, a new underground drainage system, swales, decorative pedestrian lighting and pavement rehabilitation.

Project Justification / Relation to Other Projects

The City was awarded a federally funded grant by the Transportation Planning Agency of Palm Beach County (TPA) under its Local Initiatives Program with a focus on pedestrian and bicycle accommodation and complete streets. In addition, the existing pavement has deteriorated to a point where it needs rehabilitation.

City of Delray Beach, Florida
Capital Improvement Project Request
Fiscal Year 2024 - 2028

Project Title: PC Replacement
Project Location: Citywide
Department: Information Technology
Contact Person: Don Marese
Project Status: ☐ New Project ☐ Project Continuation ☒ Annual Project
Project Origination Date: Annual Project

Project Description

PC/Laptops/Monitors – required for annual PC replacement. 20% of all City PC's need to be refreshed each year. We have a 5-year refresh rate for 100% PC replacement. Replacement cycle is 130 PC/Laptop per year. This does not include PD laptops. PC Workstations and Laptops have not been replaced on a scheduled basis in the past few years. This item is for a five-year replacement plan for all workstations and laptops. The plan is to replace PC workstations with laptops and docking stations for a potential remote workforce. This item would not be required if we were to switch to IT as an internal service fund.

Project Justification / Relation to Other Projects

IT Policy - IT.P0014 - Technology Replacement and Upgrade Policy states that Laptop Computers be replaced in the Fiscal year immediately after the 4th year of use, and Workstation computers after the 5th year of use. PC Replacement is needed to create a City Organization of Excellence. The current PC environment requires replacement every 5 years for security and technology upgrades. PC's and laptops have been failing due to age and unable to execute the current Security protocols. In the last year, we have replaced 23 machines due to hardware failures and have had the Dell PC technician in 18 times to replace motherboards and other equipment. Without this request, individual Departments will need to budget for their own PC replacement for failures. We requested this in previous year's CIP and were unfunded for this replacement.

Project Description

Replacement of two (2) Gasoline Dispensers and one (1) Diesel Fuel Dispenser at Public Works; and one (1) Dual Gasoline Dispenser at Police Department.

Project Justification / Relation to Other Projects

Existing Fuel Dispensers have exceeded life expectancy, resulting in poor performance and disruptions in reliable fuel supplies for City vehicles. Maintenance and service costs have also increased due to use beyond life expectancy.

Project Title: Fleet Software Update
Project Location: City Garage
Department: Public Works/Fleet Maintenance
Contact Person: Andrew Rayfield
Project Status: ☒ New Project ☐ Project Continuation ☐ Annual Project
Project Origination Date: 10/1/2023

Project Description

Replacement of current Fleet Maintenance software, 10 rugged technician tablets, the integration of city fleet data, and the initial year of support and maintenance.

Project Justification / Relation to Other Projects

The current version of Fleet's software is 18 years old and lacks proper interdepartmental communication and real time fleet forecasting. Our current subscription only allows a limited number of assigned users and makes sharing information with other departments difficult. With newer software and technician tablets, Fleet can achieve a more streamlined preventative maintenance (PM) process, better labor tracking on assets, additional user interfaces for clarity on fleet operations, and more efficient cost projections associated with the City's fleet. This data-driven software will help to optimize Fleet's operation.

Contact Person: Sammie L. Walthour

Project Status: ☒ New Project ☐ Project Continuation ☐ Annual Project

Project Origination Date: 10/1/2023

Project Description

Funds requested to repair, replace and bring up to code pertinent housing measures. This would also remove health or safety hazards from facility and focus on individual housing components such as heating and insulation, plumbing, structural concerns, lead, asbestos, or mold.

Project Justification / Relation to Other Projects

The Neighborhood Resource Center (NRC) was established in the fall of 2006 in concert with the City's goal to assist residents with creating and maintaining quality neighborhoods where people want to live. The NRC is a collaboration of several services under one roof in concert with City Administration. All components participate in addressing the needs of residents and improving the quality of life. It encourages residents' constant engagement in the planning process to address physical, social and economic needs; offers a variety of services, community meetings and educational workshops.

Project Title: Roadway Restoration

Project Location: Citywide

Department: Public Works

Contact Person: Jason Kaufman

Project Status: ☐ New Project ☐ Project Continuation ☒ Annual Project

Project Origination Date: Annual Project

Project Description

Pavement restoration using various techniques to extend pavement life or replace pavement that has gone beyond its useful life. Examples of restoration techniques include crack filling (minimal effort), milling/resurfacing (moderate effort) and full depth pavement replacement (major effort).

Project Justification / Relation to Other Projects

A Pavement Management Report was completed in 2019. The report assessed the condition of every roadway within the City and assigned each roadway a Pavement Condition Index (PCI) score. The report also included a proposed 10-year work plan to address pavement issues throughout the City. It is anticipated that an updated pavement condition assessment will be completed every 5 years.

Project Origination Date:

October 2016

Project Description

Reconstruction of the of the historic building that was destroyed by fire, to accommodate the Wellness Center and additional City office space.

Project Justification / Relation to Other Projects

On February 25, 2020, the historic Seaboard Air Line Railroad Station was largely destroyed by fire. Due to its important historical significance, the City decided that it should be reconstructed. The building is being reconstructed by the City's insurer, Florida Municipal On February 25, 2020, the historic Seaboard Air Line Railroad Station was largely destroyed by fire. Due to its important historical significance, the City decided that it should be reconstructed. The building is being reconstructed by the City's insurer, Florida Municipal Insurance Trust (FMIT), under the TurnKey Recovery Program, through FMIT Recovery Manager SynergyNDS. The insurance company is only rebuilding what originally existed, which does not include the proposed office buildout of the northern warehouse section or any site improvements. The project will be constructed as a whole, to include both insurance and non-insurance (capital improvement sections) scopes of work. The City will contribute a portion of the cost to pay for the capital improvement sections.

\$1,500,000 total was allocated for construction in FY2022 & FY2023. The estimated construction cost has increased due to significant increases to actual and anticipated construction costs.

City of Delray Beach, Florida

Capital Improvement Project Request

Fiscal Year 2024 - 2028

Project Title: Replacement of Fire Station No. 113
Project Location: 651 W. Linton Boulevard
Department: Public Works
Contact Person: Isaac Kovner (16-012)
Project Status: ☐ New Project ☒ Project Continuation ☐ Annual Project
Project Origination Date: October 2018

Project Description

Construct a new 16,000 square feet, 2-story fire station facility on the site to replace the existing fire station. This project will include the demolition of the existing structure, construction of the new facility, site work to include additional parking, landscaping, drainage, etc. The desired goal is to construct a new complete Category 5 rated fire station meeting today's Building Codes, ADA, and Green Building requirements.

Project Justification / Relation to Other Projects

Originally constructed in 1971, the facility has been refurbished and expanded on numerous occasions to meet changing standards and to meet the expectations of our citizens and business partners for fire and emergency services. The primary use of this facility is a continuously occupied fire station with living facilities. Over the 50 years, issues related to plumbing, design, mold, water damage and rodent infestations have made the living space intermittently uninhabitable. The frequency of maintenance related issues and costs have increased annually. In general, the facility has exhausted its useful life.

Project Title:

**SE 36th Avenue / Gulfstream Boulevard
Streetscape Improvements**

Project Location:

Seacrest Boulevard to FEC Railroad

Department:

Public Works

Contact Person:

Isaac Kovner

Project Status:

☐ New Project ☒ Project Continuation ☐ Annual Project

Project Origination Date:

October 2019

Project Description

Design and construction of streetscape improvements to include new ADA compliant sidewalks and curb ramps, lighting, landscaping, drainage and pavement rehabilitation.

Project Justification / Relation to Other Projects

The existing roadway surface has deteriorated and is in need of resurfacing. The City executed an Interlocal Agreement for the City of Boynton Beach to be the project lead and manage all design and engineering of the proposed improvements. The next part of the joint project will be the construction of the roadway improvements. A new Interlocal Agreement between Delray Beach and Boynton Beach will be required to move forward with the construction costs based on a 50/50 split.

City of Delray Beach, Florida

Capital Improvement Project Request

Fiscal Year 2024 - 2028

Project Title:

Historic Marine Way Seawall, Roadway and Drainage Improvements

Project Location:

Marine Way

Department:

Public Works

Contact Person:

Isaac Kovner (17-047)

Project Status:

☐ New Project ☒ Project Continuation ☐ Annual Project

Project Origination Date:

October 2018

Project Description

The project includes installation of a new seawall, buried stormwater pump station, on-site backup generator and rehabilitation/replacement of existing drainage, sanitary sewer and water infrastructure. Other improvements include walkways, pavement resurfacing, decorative lighting, landscaping, and protection of existing mangroves.

Project Justification / Relation to Other Projects

The top of existing rubble seawall ranges from -1.1 ft to 1.0 ft (NAVD88) and was constructed about 80 years ago. The recorded average King Tide elevation from 2007 through 2021 was 2.53 ft (NAVD88). Sea level rise projections have King Tide reaching elevation 4.74 ft in 2068. When King Tides occur, residents have difficulties accessing their homes due to street flooding and have experienced repeated damage to their properties. Local businesses have suffered reduced revenue and repeated repairs, while the City also needs to close off roads and install temporary barriers to hold back rising waters. Emergency vehicles cannot access the area when flooding occurs. In addition, constant road repairs are needed due to the roadways being frequently flooded for extended periods of time.

Project Status: ☐ New Project ☒ Project Continuation ☐ Annual Project

Project Origination Date: 10/1/2022

Project Description

New 14 MGD Water Treatment Plant. A new nanofiltration water treatment plant is needed to produced finished water that meets more stringent water quality parameters for color, hardness, as well as being able to meet other emerging contaminants. The new plant will have a permeate capacity of 14 MGD. This project will consist of designing and costruction of the pretreatment system, membrane trains, degassifiers and scrubbers among others.

Project Justification / Relation to Other Projects

Operational challenges to meet regulations with existing WTP. Finished water from the new plant will be blended with the existing plant. Meet color and new emerging contaminants.

Project Status: ☒ New Project ☐ Project Continuation ☐ Annual Project
Project Origination Date: 10/1/2023

Project Description

Under Service Authorization #18-17, the City has requested Kimley-Horn's assistance in identifying up to six (6) potential surficial aquifer well sites. The City has also requested Kimley-Horn's assistance in the permitting of up to six (6) new well sites with SFWMD.

Project Justification / Relation to Other Projects

New wells are needed due to aging and a will allow more flexibility on water demand, to maintain existing when taken out of service for well maintenance and rehabilitation.

Project Title:	Upgrade to Telemetry System - SCADA
Project Location:	200 SW 6th Street
Department:	Utilities
Contact Person:	Juan Guevarez
Project Status:	<input type="checkbox"/> New Project <input checked="" type="checkbox"/> Project Continuation <input type="checkbox"/> Annual Project
Project Origination Date:	10/1/2021

Project Description

Upgrade of an old 20-year telemetry Supervisory Control & Data Acquisition (SCADA) system used for monitoring the operations of utility assets such as lift stations and the water treatment plant. Upgrade of current system is required as replacement parts are becoming obsolete. Phase 1 is on going as part of RFQ #2020-015 This project will require several phases as the conversion is extensive and time consuming.

Project Justification / Relation to Other Projects

Upgrade of the SCADA system is essential to properly monitor and operate Water Treatment, Water Distribution and Wastewater Collections. A properly setup SCADA system allows the operation to be both effective and efficient. It is our eyes and ears to monitor and operate 24 hrs a day 365 days a year. An unreliable SCADA system, risks adversely affecting our customers since it directly impacts our drinking water and wastewater collection; two of the most essential services.

Project Title:

**Variable Frequency Drives (VFD) for
South & North Pump Stations**

Project Location:

434 S. Swinton Avenue

Department:

Utilities

Contact Person:

Juan Guevarez

Project Status:

☒ New Project ☐ Project Continuation ☐ Annual Project

Project Origination Date:

10/1/2024

Project Description

Installation of new Variable Frequency Drives (VFD) for the City's high service pumps at both the north and south pump stations. The new VFDs will allow the pump motors to throttle up or down as needed based on the water demand which more effectively controls pressure leaving the pump station. Additionally, the VFDs will be connected to SCADA providing the City with the benefits of remotely operating the high service pumps.

Project Justification / Relation to Other Projects

Existing pump systems are out dated and in despair. Replacment will allow the ability to better control water demand, as well as conserve on water.

Project Title: Replacement of Utilities Generators
Project Location: 434 S. Swinton Avenue
Department: Utilities
Contact Person: Harold Williams
Project Status: ☒ New Project ☐ Project Continuation ☐ Annual Project
Project Origination Date: 10/1/2023

Project Description

Annual replacement of three (3) 20-30 older Liftstation generators that have reached the end of their useful life.

Project Justification / Relation to Other Projects

Portable generators are critical for maintaining operations during a power outage event replacement of aging generators ensures continued operations.

Project Title: Reclaimed Water Area 5, & Connecting Services in Area 10 & 14

Project Location: Germantown Road - "Area 5"

Department: Utilities

Contact Person: Robert Hunt

Project Status: ☐ New Project ☒ Project Continuation ☐ Annual Project

Project Origination Date: 10/1/2023

Project Description

The project continues the expansion of the reclaimed water system into "Area 5" of Germantown Road, as well as completion of connecting reclaimed services in "Area 10" and "Area 14".

Project Justification / Relation to Other Projects

Expansion of the reclaimed water system is required to comply with the FDEP Section 403.086(9)(e)(1), which requires facilities with ocean outfalls to install functioning reuse systems by December 2025, providing 60 percent of the facilities actual flow for reuse purposes. FDEP Ocean Outfall legislation, is a demand management tool to reduce irrigation dependency on potable water resources, and increases the level of service to the community.

Capital Improvement Project Request

Fiscal Year 2024 - 2028

Project Title: Thomas Street Pump Station Rebuild
Project Location: Thomas Street
Department: Public Works
Contact Person: Isaac Kovner (18-017)
Project Status: ☐ New Project ☒ Project Continuation ☐ Annual Project
Project Origination Date: October 2019

Project Description

Construct a new 85,000 gallon per minute (GPM) stormwater pump station and replace drainage system that discharges to the pump station. The project also includes an on-site backup generator, fuel tank, buried underground powerlines, landscaping and roadway restoration.

Project Justification / Relation to Other Projects

The existing 18,000 GPM stormwater pump station was originally built in 1976 and has reached the end of its designed useful life (approx. 50 years). The pump station is a vital lifeline for approx. 800 residents living in the 50-acre drainage basin. It has experienced frequent breakdowns since 2017 Hurricane Irma. The major breakdown in March 2019 cost the City over \$300,000 in emergency equipment to keep functioning while the pump was being repaired. The existing pump station does not meet SFWMD Level of Service criteria for 30-year sea level rise and tidal conditions. The new pump station will provide increased protection such as 100-year 3-day storm flood protection and 30-year projected sea level rise resilience.

Notes: In FY2023, \$3,675,000 was allocated for construction and inspection, of which \$1,837,500 (50%) was funded by legislative appropriations. The estimated construction cost has increased due to significant increases to actual and anticipated construction costs. Resilient Florida Grant 22FRP134.

City of Delray Beach, Florida

Capital Improvement Project Request

Fiscal Year 2024 - 2028

Project Title: Historic Marine Way Seawall, Roadway and Drainage Improvements

Project Location: Marine Way

Department: Public Works

Contact Person: Isaac Kovner (17-047)

Project Status: ☐ New Project ☒ Project Continuation ☐ Annual Project

Project Origination Date: October 2018

Project Description

The project includes installation of a new seawall, buried stormwater pump station, on-site backup generator and rehabilitation/replacement of existing drainage, sanitary sewer and water infrastructure. Other improvements include walkways, pavement resurfacing, decorative lighting, landscaping, and protection of existing mangroves.

Project Justification / Relation to Other Projects

The top of existing rubble seawall ranges from -1.1 ft to 1.0 ft (NAVD88) and was constructed about 80 years ago. The recorded average King Tide elevation from 2007 through 2021 was 2.53 ft (NAVD88). Sea level rise projections have King Tide reaching elevation 4.74 ft in 2068. When King Tides occur, residents have difficulties accessing their homes due to street flooding and have experienced repeated damage to their properties. Local businesses have suffered reduced revenue and repeated repairs, while the City also needs to close off roads and install temporary barriers to hold back rising waters. Emergency vehicles cannot access the area when flooding occurs. In addition, constant road repairs are needed due to the roadways being frequently flooded for extended periods of time.

Florida Adaptation
Planning Guidebook

Project Description

The City received a Florida Department of Environmental Protection (FDEP) grant to develop a Coastal Resiliency Adaptation Plan. An Adaptation Plan provides a sound and sensible method for Florida's coastal communities to develop and enhance their strategies for protecting coastal populations and infrastructure.

Project Justification / Relation to Other Projects

In August of 2021, the Coastal Resilience Partnership of SE Palm Beach County (CRP) completed a Climate Change Vulnerability Assessment (CCVA) for eight jurisdictions, including the City of Delray Beach (City). The analysis needs to be updated, or a new analysis done, to meet the requirements of s.380.093 F.S. This proposal is to perform a vulnerability assessment and infrastructure adaptation plan (IAP) for the City, using NOAA intermediate-low and intermediate-high sea level rise projection data.

The Governor has consistently encouraged DEP and the Statewide Office of Resilience to empower local communities to better understand their unique flood vulnerability and to begin designing effective adaptations to reduce current and projected flood and storm surge risks to their residents and infrastructure. Additionally, the Governors Executive Order 23-06 supports the completion of vulnerability assessments (VA) for all Florida counties and municipalities by 2026. Beginning in 2024, entities without a comprehensive VA and IAP will not be eligible for funding.

Capital Improvement Project Request

Fiscal Year 2024 - 2028

Project Title:	Replacement of Seawalls
Project Location:	Citywide
Department:	Public Works
Contact Person:	Elsa Gonzales-Soto
Project Status:	<input checked="" type="checkbox"/> New Project <input type="checkbox"/> Project Continuation <input type="checkbox"/> Annual Project
Project Origination Date:	October 2023

Project Description

Project includes engineering design and construction of various seawalls in need of replacement.

Project Justification / Relation to Other Projects

Since 2018, the City has performed 2 rounds of inspections on all City-maintained seawalls and prepared studies which evaluated their vulnerability related to projected sea level rise. Most seawalls have reached their design life and need improvements such as raising seawall caps or complete replacement. Cracking, exposed rebar, sink holes behind the walls, spalling and continuous nearby street flooding are documented and monitored. The studies have identified and prioritized seawalls in need of replacement, repair or no action. This project will also put City public seawalls in compliance with newly passed seawall ordinance, which requires both public and private seawalls at minimum elevation +4.0 and in good condition.

City of Delray Beach, Florida

Capital Improvement Project Request

Fiscal Year 2024 - 2028

Project Title: Lakeview Drive Drainage Improvements
Project Location: Lakeview Drive
Department: Public Works
Contact Person: Elsa Gonzales-Soto
Project Status: ☐ New Project ☒ Project Continuation ☐ Annual Project
Project Origination Date: October 2021

Project Description

Project includes installation of new drainage system and modifications to roadside swales to alleviate flooding and standing water.

Project Justification / Relation to Other Projects

Ponding occurs at the west end of Lakeview Blvd and at the intersection of Lakeview Blvd and Lakeview Drive. There is also ponding in swales, on driveways and in the street. The existing conditions have resulted in the standing water to be stagnant and creates a breeding ground for mosquitos and other pests. In essence, ponding water cannot be conveyed to the catch basins for ultimate discharge into the master lake. Flow from each swale is restricted by the higher elevations of the individual driveways. In addition, video inspection of existing drainage pipes show crushed pipes and root intrusion.

Project Location: Citywide
Department: Public Works
Contact Person: Elsa Gonzales-Soto (23-006)
Project Status: ☒ New Project ☐ Project Continuation ☐ Annual Project
Project Origination Date: October 2023

Project Description

Create a public art partnership opportunity with the Public Art Advisory Board with the goal of adding colorful art to the City's stormwater system that is both aesthetically pleasing and educational for the public.

Project Justification / Relation to Other Projects

Public education for stormwater is a requirement of the City's NPDES permit and this is one of the more colorful and collaborative opportunities for spreading the right message about the importance of protecting the City's stormwater system and public waterways.

Project Origination Date: 10/1/2023

Project Description

Purchase of a 105' Pierce Tiller Aerial Fire Apparatus to replace current Aerial Apparatus that has reached the end of useable service life.

Project Justification / Relation to Other Projects

The usable life cycle for this fire apparatus is 15 years, 10 years in frontline service and 5 years in reserve status. This apparatus would be the replacement for the next fire apparatus due for replacement. Aerial apparatuses are essentially fire trucks with hydraulic ladders attached, adding versatility during firefighting and rescue operations. These types of apparatuses provide enhanced capabilities that are unique due to the additional hydraulic ladder which can discharge water from elevated positions up to 100' high, while simultaneously providing a means of egress or rescue from the exterior of a building. Aerial fire apparatuses are also a consideration in maintaining our ISO classification. We are required to maintain aerial coverage within a specified travel distance. Additionally, technical rescue capabilities are enhanced by using aerial apparatuses as "high-point" anchors for rope and tower rescues.

City of Delray Beach, Florida
Capital Improvement Project Request
Fiscal Year 2024 - 2028

Project Title: Public Restroom Renovation
Project Location: Various Locations
Department: Parks & Recreation
Contact Person: Sam Metott
Project Status: ☒ New Project ☐ Project Continuation ☐ Annual Project
Project Origination Date: 10/1/2024

Project Description

Upgrade to public restrooms throughout the City.

Project Justification / Relation to Other Projects

Public Restrooms throughout the city need functional and aesthetic upgrades. GO bond funds will be used to renovate restrooms to provide a better experience to visitors.

Project Title: Beach Access Improvements

Project Location: Beach Access along A1A

Department: Public Works

Contact Person: Isaac Kovner

Project Status: ☒ New Project ☐ Project Continuation ☐ Annual Project

Project Origination Date: October 2023

Project Description

Design and construction of features to prevent sand from entering shower drains at various beach access points along A1A.

Project Justification / Relation to Other Projects

This project aims to reduce the amount of windblown sand at beach access points. This will both create a cleaner more aesthetic beach access and greatly reduce the amount of shower drain maintenance due to sand clogging.

City of Delray Beach, Florida
Capital Improvement Project Request
Fiscal Year 2024 - 2028

Project Title: Main Beach Pavilion Structural Repairs
Project Location: Atlantic Avenue Beach Access
Department: Public Works
Contact Person: Isaac Kovner
Project Status: ☒ New Project ☐ Project Continuation ☐ Annual Project
Project Origination Date: October 2023

Project Description

Replacement of all existing metal supports, hardware, and connections on the structure with 316 Stainless Steel to prevent the continual deterioration of the Main Pavilion's structural supports.

Project Justification / Relation to Other Projects

The Main Beach Pavilion structural supports did not utilize 316 Stainless Steel. Being located in a harsh saltwater environment and adjacent to the ocean, continual rusting and deterioration of the non-stainless steel supports is evident. An August 2022 Evaluation and Condition Assessment confirmed that based on site observations and the structural analysis, the Main Beach Pavilion is in poor condition. The posts of the pavilion do not meet FBC requirements and are significantly overstressed and most steel connections were observed to be severally corroded. Strengthening of all wood columns and replacement with 316 Stainless Steel hardware is proposed.

Capital Improvement Project Request

Fiscal Year 2024 - 2028

Project Title: New Police Department Headquarters
Project Location: 300 W. Atlantic Avenue
Department: Public Works
Contact Person: Isaac Kovner
Project Status: ☒ New Project ☐ Project Continuation ☐ Annual Project
Project Origination Date: 10/1/2023

Project Description

Design and construction of a new Police Department headquarters meet the current and future staffing needs, the need for parking garage and to create a new facility that meets current codes and standards. This project will be funded by the Public Safety General Obligation Bond.

Project Justification / Relation to Other Projects

A new Police Department and parking garage are needed as a central command facility. A space needs assessment completed in 2018 confirmed that the existing facility is not big enough to accommodate current and future needs of the police staff. An updated space needs assessment will be required based on the vision of the current Police Department's administration. A new facility will have a ROI for the next 50 years.

Project Location: 35 Andrews Avenue
Department: Public Works
Contact Person: Isaac Kovner
Project Status: ☒ New Project ☐ Project Continuation ☐ Annual Project
Project Origination Date: 10/1/2023

Project Description

Design and construction of the replacement to Fire Station 112. The fire station has reached the end of its useful life, is not capable of withstanding Category 5 hurricane force winds and needs to be replaced. This project will be funded by the Public Safety General Obligation Bond.

Project Justification / Relation to Other Projects

This facility currently does not meet current building codes required for a building to be considered capable of withstanding Category 5 hurricane force winds or be considered a critical infrastructure building. This project will design and construct the replacement of Fire Station 112 to be rated for 180 mph winds. A space needs assessment will be required based on the vision of the current Fire Department's administration. A new facility will have a ROI for the next 50 years.

City of Delray Beach, Florida

Capital Improvement Project Request

Fiscal Year 2024 - 2028

Project Title: Ocean Rescue Locker Room & Storage Improvements

Project Location: 340 S. Ocean Boulevard

Department: Fire/Ocean Rescue

Contact Person: Kevin Green, Assistant Fire Chief

Project Status: ☒ New Project ☐ Project Continuation ☐ Annual Project

Project Origination Date: 10/1/2023

Project Description

Complete renovation of the lifeguards locker room facilities including the replacement of the rusted metal lockers. Purchase and installation of a new storage facility to secure tools and Ocean Rescue equipment.

Project Justification / Relation to Other Projects

The saltwater environment is extremely hard on facilities. Due to environmental factors, age, and daily use of the locker room facilities, they are in extremely poor condition and in need of a complete tearout and replacement of tile, plumbing fixtures, and lockers. Ocean Rescue currently stores all of its tools and equipment in the ground floor garage of the headquarters building. This includes ATVs, row boats, rescue surf boards, a 4x4 side-by-side, and physical fitness equipment. The space has long outgrown its need. A detached storage building will allow for adequate spacing needs for assets that are used on a daily basis and will save valuable time each day by allowing for proper storage.
