#### Sec. 4.4.26. Light Industrial (LI) District.

[New Section Enacted by Ord. 20-93 2/23/93]

- (A) **Purpose and intent.** The Light Industrial (LI) District provides an opportunity to site, develop, and maintain high quality industrial land uses outside of an industrial park setting. It also allows certain industrial land uses to be located in areas which are considered to be environmentally or aesthetically sensitive. This District is appropriate in such areas due, in part, to the development standards, which are more strict than those found in the "I" and "MIC" Districts. While the LI District has flexibility in its application, it is not to be applied to small lots or other circumstances which would lead to non-conforming site development. (Ord. No. 23-20, § 32, 9-10-20)
- (B) **Principal uses and structures permitted.** The following types of uses are allowed within the Light Industrial (LI) Zone District as a permitted use:

Further, when located within Wellfield Protection Zone 1, 2, or 3, materials used in such testing and evaluation shall not exceed an aggregate amount of 25 gallons per gross acre of land area for any material which is listed on the Regulated Substance list as maintained per Section 4.5.5(B) (Wellfield Protection). [Amd. Ord. 74-94 10/18/94]
