**Re: Tree Disposition Plan and Infrastructure Plan
Parks at Delray Class II Site Plan – Plans Update**

Dear Mr. Pape-

The plans noted above have been updated to reflect a site field review on 10-19-2021. The date on these sets of plans is 10-21-2021 and the changes are as follows-

1. The trees to be relocated list was changed and those changes are shown in a red box on the Tree Disposition Plan. These trees to be relocated are dead (one appears to have been struck by lightning).
2. A cabbage palm was changed from the Removed List to the Relocated List.
3. The Totals and Required Replacement lists were updated to reflect the above. The trees that are now dead were added to the Remove List and added to the Required Replacement List based on their original condition (either replaced by d.b.h./cal. or 1:1).
4. The Infrastructure Plan was updated to reflect the above revisions.
5. Any remaining tree mitigation will be part of the Landscape Plans for the site which will note a running tally for tracking replacements.

Please feel free to contact me should you have any questions or need additional information.

Sincerely,
Covelli Design Associates, Inc.
