Re: Request for Proposal – 2017-046 Island Drive Seawall Repairs

Marine Engineering & Construction, Inc. is pleased to present our attached proposal for labor, equipment, materials and other operations to repair the Island Drive seawall.

Marine Engineering & Construction, Inc. has been providing marine construction to both commercial and residential clients in Florida for over fourteen years. We take pride in our ability to complete projects in a safe, timely and economical manner and are extremely committed to our corporate mission statement “to exceed our customers’ expectations in quality, delivery and cost.

Our equipment assets include a 120-foot steel construction barge, 1000 H.P. tug boat, 50-ton crawler crane, pile driving equipment, excavation equipment, 6” high pressure water jet pump, 30’ tool punch for punching into rock substrate. We work closely with our clients and their engineers to help provide the products and designs that best fit their needs. Our facility is located in Lantana, near Veterans Park making staging for this project logistically convenient.

Our logistics plan for this project will be to install a pre-stressed concrete pile and a precast concrete sheet panel retaining wall with a cast-in-place concrete pile cap to enclose the new and existing wall.
