We rake and clean the beach. We also use a sifter and twice a year a tiller. The cans on the east side of the dunes are emptied every day and disposed of the contents. We also move life guard towers, pick up dead turtles, sharks and oars that wash up. Then we dispose of them at the transfer station. We have worked on the City beach for 25 or 30 years and are currently. It is a mile and a half. \$73,000 a year

2. City of Boynton Beach for 25 plus years. This is a small beach 0.2 miles. All we do is clean it. We do not service cans or sift or till. For approx. \$5,000 a year

They are a fairly new client the last 3 or 4 years. We move sand and sift the beach for them on an as needed basis. \$175.00 per hour

We have many more condos, club and private homes. For example we have for 25 years cleaned the beach at Delray Sand's Resort, owned by the Walsh family of the Delray Marriott. We can give you more names and contacts but I think we gave you the most important ones.
