

Dear Customers and Suppliers of F2 Industries, LLC,

Chemrite Incorporated and F2 Industries are excited to announce the acquisition of F2 Industries LLC by Chemrite Incorporated.

F2 Industries LLC (F2) was started in 2001. It is a global provider of chemicals and services for potable water and wastewater plants, environmental remediation projects, and disinfection products for the swimming pool industry.

Chemrite was started in 1988 and provides chemicals and equipment for water and wastewater treatment in municipal, industrial, and agricultural markets.

Over the last few years, Chemrite has seen rapid growth in all its markets and its acquisition of F2 allows it to continue this growth. F2 has a large product line of phosphates, powdered activated carbon, permanganates, and calcium hypochlorite, with established product names and recognition in the market. Adding these products will expand Chemrite's product line and give Chemrite access to a growing customer base.

Reb Ferrell, one of the founders of F2, will continue to work at Chemrite and will be a great technical and business asset.

This acquisition of F2 by Chemrite, will not impact any customer and vendor relationships. Chemrite is retaining F2 employees and they will continue to maintain current customer relationships. In the short term, you may begin to see new email addresses and billing information coming from Chemrite. If you have any questions, please contact your F2 sales person or Chemrite directly.

We appreciate your business and look forward to continuing to supply you with quality products and excellent customer service.

Regards,
