| • Drivers will utilize a Driver App to enable real-time tracking and counting passengers | • Riders will immediately be given an estimated wait time based on driver availability |
| • Data Integration | • Program Management |
| • Vehicle Maintenance | |

- Advertising plan: Split of advertising revenues would be between Vector Media for filling the space and CRA (50/50).

Term:

The pilot program shall be for up to one (1) year from contract award (approximately May 1, 2019 through April 30, 2020). The CRA may extend the term of this contract by written notice for two (2) additional one (1) year periods.

***RFP required:** The use of environmentally friendly vehicles is **required**, more specifically a neighborhood electric vehicle (NEV), GEM car, or similar that meets the Federal Motor Vehicle Safety Standard (FMVSS) and supply state-of-the-art charging equipment. The vehicles used throughout the term of the contract must be consistent and identifiable with the appropriate program signage.

**** Addendum No. 1: Would a Chevy Bolt be a vehicle that could be considered similar to a NEV or GEM car for this solicitation? Or is the CRA only looking at NEV's and LSV's (Low Speed Vehicles) for this application?**

The CRA is looking to provide the service with Neighborhood Electric Vehicles (NEV), GEM car, and Low Speed Vehicles type. Please refer to Section 4.1 of the RFP: The vehicle will be a neighborhood electric vehicle (NEV), GEM car, or similar that meets the Federal Motor Vehicle Safety Standard (FMVSS) and supply state-of-the-art charging equipment". A Chevy Bolt would not be considered similar to a NEV or GEM car.
