HOUSING

WHAT IS THE HOUSING ELEMENT?

The Housing Element has several characteristics that distinguish it from other elements mainly because housing is primarily provided by the private sector and market demand largely dictates the type and location of housing developments. As a place to live is an essential human need, the public sector has the responsibility to ensure that safe, healthy, and diverse housing opportunities are provided to all residents of all income levels. Housing choice is impacted by a number of factors, including personal choice, financial limitation, value, safety, and cost.

The purpose of the Housing Element is to analyze local housing and neighborhood conditions, local housing trends and housing issues, identify existing and projected deficits in the supply of housing to meet the needs of the City's population, and develop policies to improve the livability of neighborhoods, provide a range of housing choices, improve the equity of the housing market and increase efficiency of the housing delivery system. The City of Delray Beach Housing Element provides principles, guidelines, standards, and strategies to ensure that sufficient supply of quality housing is provided for a growing and socio-economically diverse population.
