Officer Activity

In addition to the quantitative data, officers also perform activities that are non-quantitative such as: Crime Prevention through Environmental Design (CPTED) projects, providing general assistance/acts of service, management of crowds, and implementing crime prevention initiatives such as the “No Cash Here” program. Officers work collaboratively with the service population advocate to assist with our vulnerable population (i.e. the homeless, those with mental health issues and those suffering from addiction).

Clean & Safe supervisors must manage manpower in order to balance their daily responsibilities to include visibility, enforcement actions, crime prevention and deterrence activities, addressing hot spot locations, engaging with our community, managing traffic and responding to calls for service.

Common Issues/Concerns

- **Thefts**
- **Panhandling**
- **Homeless population**
- **Nuisance activity**
- **Traffic**
- **Capacity/overflow issues

Pedestrian Traffic

New growth (business and residential) in and around the Clean & Safe area makes walking an attractive option. As a result, pedestrian traffic can be expected to remain high and increase over time.

As pedestrian traffic increases, so does the opportunities for serious crimes to occur. Nationally, areas/venues that attract large crowds have become vulnerable and feasible target locations for active shooters. Officer presence in these areas is imperative.

Current Staffing

- **Ten Officers, one Community Service Officer and Two Sergeants**
- **The officers deployed in various combinations of shifts to maximize staffing levels (12, 10 and 8 hour shifts)**
- **Sergeants work a 12 hour schedule in order to supervise and communicate with personnel on all shifts. Sergeants work opposite shifts (alpha/bravo) to provide 7 day supervisory coverage**
- **Manpower is deployed based on calls for service and peak traffic and pedestrian volume**
