LAW ENFORCEMENT

Enhance performance of patrol and pursuit vehicles.

This advanced performance powertrain calibration is designed to meet the demanding needs of law enforcement patrol and pursuit vehicles. It combines the benefits of enhanced vehicle performance and fuel efficiency improvements.

Performance enhancements include increased horsepower (+10 -15hp), improved throttle response, and quicker acceleration.

Fuel efficiency gains are achieved by the ability to set speed limits (or remove them) and reduce idle RPM levels by 10%, 20% or 30%. The vehicle's speed limit setting is adjustable to the exact speed you require; or the speed limiter can be turned off.

Vehicle calibrations are programmed into the vehicle via Derive Efficiency's exclusive hand-held programmer through the OBDII diagnostic port with no tools required.

FUEL ECONOMY

Save fuel when driving and idling. Reduce your carbon footprint.

Derive Efficiency's fuel economy program is developed to maximize the fuel economy of your fleet. This program contains hundreds of precise changes in key areas of the vehicle calibration. By optimizing these parameters, you can reduce your vehicle's average fuel consumption by up to 12% annually.

Speed Limiter: The speed limiter option allows you to set a vehicle's maximum speed.

Idle RPM: Idle RPM levels can be reduced by 10%, 20% or 30%.

Throttle Response: Optimize the electronic throttle control to moderate acceleration levels.

Active Fuel Management: Optimize the various stages of active fuel management (also called displacement on demand), which will active and deactivate cylinders on the fly based on the vehicle's power requirements.

Transmission: Optimize the transmission shift points by shifting the transmission at lower engine speed levels and lock the torque converter to rear-wheels at lower vehicle speeds.

Proven Fuel Facts:

- Increase your fleets overall Fuel Economy by up to 12%
- 10-30% Reduction in Idle Fuel Consumption
- Fuel gains independently Lab Tested & Verified
- 50 State Emissions Legal
- Reduces your company's Carbon Footprint
- Prevents premature vehicle wear and prolongs the vehicles life cycle

Vehicle calibrations are programmed into the vehicle via Derive Efficiency's exclusive hand-held programmer through the OBDII diagnostic port with no tools required.
