Elevation  
Scale 3/8" = 1'-0" @ 11 x 17

Plan View  
Scale 3/8" = 1'-0" @ 11 x 17

WEIGHT: APPROX. 750 LBS.

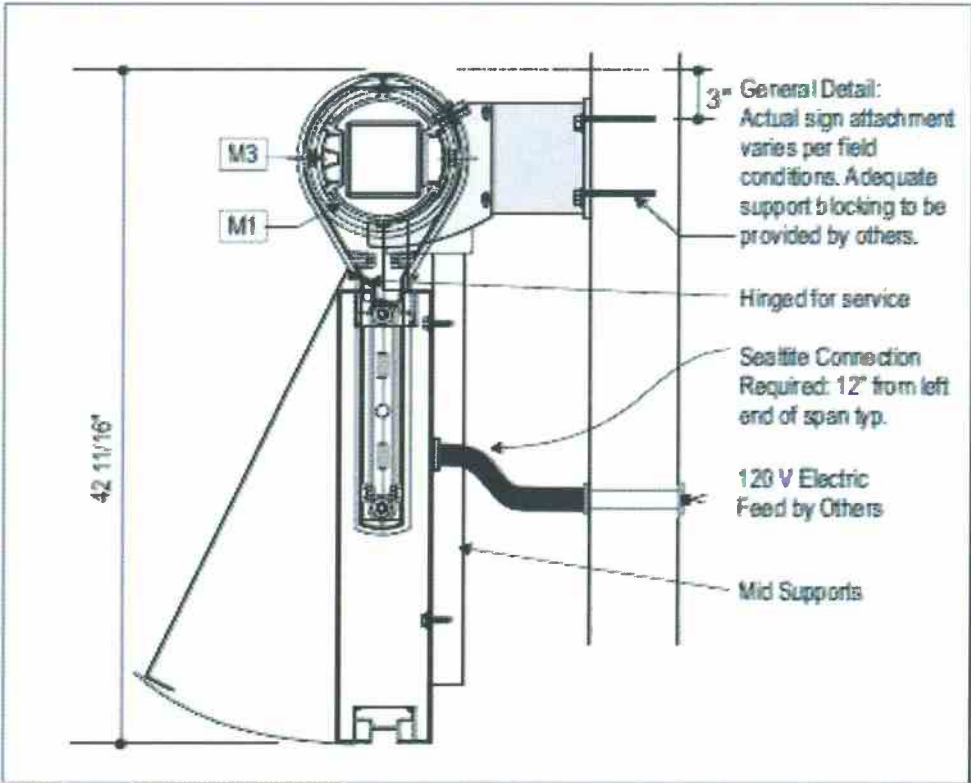

**Specifications:**  
Sign modules are fabricated from .090 aluminum faces painted G2.  
Internally illuminated routed faces.  
Lettering is 3/4" clear acrylic push-through with 20 gauge Polished Stainless Steel on first surface.  
Logo modules are identical to pylon modules, mounted with stainless steel hardware.

**Material Description**

| Material | Description                                                                                                                                                       |
|----------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| M1       | 200mm pole - bearing structure. Length as required (2" past outside cantilevers, typ.)                                                                            |
| M2       | Cantilever supports at each end of facade module (36" ±) w/ 3/8" hardware per Mounting Detail                                                                     |
| M3       | LED insert strip on front of bearing structure (typ)                                                                                                              |
| M4       | Blank insert strip on building side of bearing structure (typ)                                                                                                    |
| M5       | End Cap (typ)                                                                                                                                                     |
| M6       | Wall Brackets: Spaced no further than 5'-6" ± as required for overall length. Minimum three required per bearing structure.                                       |
| M7       | Middle Support Brackets: on modules longer than 10 feet. Brackets add stability to sign structure. Spaced 6'-0" on center (CNM1-3) and 3'-0" on center for a CNM4 |
