APPLICATION CERTIFICATION AND ACKNOWLEDGEMENT

Application is hereby made to obtain a permit to do the work and installation as indicated. I certify that no work or installation has commenced prior to the issuance of a permit and that all work will be performed to meet the standards of all laws regulating construction in this jurisdiction. A City Building Permit does not assure compliance with Homeowners Association's rules, regulations and/or deed restrictions. Applicant is advised to obtain approval from the Homeowners Association before improving any property. Applicant further acknowledges the following:

- Separate permits must be secured for ELECTRICAL, PLUMBING, MECHANICAL, WELLS, POOLS, FIRE SPRINKLER, SIGNS, LANDSCAPE, IRRIGATION, ROOFING, SHUTTERS, ETC.
- This permit becomes null and void if work or construction authorized is not commenced within six (6) months or if construction or work is suspended or abandoned for a period of six (6) months at any time after work is commenced. Permit will be considered suspended or abandoned if it does not pass an inspection within 180 days and will be subject to a reactivation fee in the amount in force at the time of reactivation.
- Failure to comply with all applicable construction regulations may result in the withholding of future permits.
- Submission of any false information or misrepresentation is a violation of law and shall result in revocation of your permit.
- NOTICE: In addition to the requirements of this permit, there may be additional restrictions applicable to this property that may be found in the public records of this county, and there may be additional permits required from other governmental entities such as water management districts, state agencies, or federal agencies.

WARNING TO OWNER: YOUR FAILURE TO RECORD A NOTICE OF COMMENCEMENT MAY RESULT IN YOUR PAYING TWICE FOR IMPROVEMENTS TO YOUR PROPERTY. A NOTICE OF COMMENCEMENT MUST BE RECORDED AND POSTED ON THE JOB SITE BEFORE THE FIRST INSPECTION. IF YOU INTEND TO OBTAIN FINANCING, CONSULT WITH YOUR LENDER OR AN ATTORNEY BEFORE COMMENCING WORK OR RECORDING YOUR NOTICE OF COMMENCEMENT.

OWNER'S AFFIDAVIT: I hereby certify that I have read and examined this application and know the same to be true and correct. All provisions of laws and ordinances governing this type of work will be complied with whether specified herein or not. The granting of a permit does not presume to give authority to violate or cancel the provisions of any other state or local law regulating construction or the performance of construction.

Permit #: _____

(Please Print)

I hereby apply for a Building Permit in the City of Delray Beach Florida and will personally supervise and control the permitted construction and will observe all of the requirements of the Building, Electrical, Plumbing, Mechanical, Zoning and other technical codes as adopted and enforced by the City of Delray Beach, Florida.

WHEN ISSUED, I UNDERSTAND THAT THIS PERMIT IS FOR CONSTRUCTION OF IMPROVEMENTS EXEMPT UNDER 489.103(7) OF THE FLORIDA STATUTES, AND CERTIFY THAT I AM THE BONA FIDE OWNER OF SAID PROPERTY. I ALSO UNDERSTAND THAT:

State law requires construction to be done by licensed contractors. I have applied for a permit under an exemption to that law. The exemption allows me, as the owner of the property, to act as my own contractor even though I do not have a license. I must supervise the construction myself. I may build or improve a one-family or two family residence or a farm outbuilding. The building must be for my own use and occupancy. It may not be built for sale or lease. If I sell or lease more than one building I have built myself within one (1) year after the construction is complete, the law will presume that I built it for sale or lease, which is a violation of this exemption. I may not hire an unlicensed person as my contractor. My construction must be done according to building codes and zoning regulations. It is my responsibility to make sure that people employed by me have licenses as required by state law and by county or municipal licensing ordinances. I certify that I have not completed a residence or duplex under an owner - builder permit within the past twelve (12) months. I am responsible for all work done by my employees and that proper provision has been made to carry the necessary workers compensation, public liability and property damage insurance, withholding of social security, federal income taxes and payments of federal and state unemployment compensation taxes, as required by law.

I, THE OWNER OF THE PROPERTY DESCRIBED AS (address) 19 N. DIXIE BLVD

Do hereby certify that I have read the foregoing, and am aware of my responsibilities, and liabilities for construction work on the above described property and do hereby covenant and agree to abide by all of the aforesaid stipulations. I further understand that any falsification of the above statements constitutes fraud and may result in cancellation of this permit and the imposition of other penalties as prescribed by law.

Dear Mr. Cope:

At the Historic Preservation Board (HPB) meeting of February 7, 2018, a Certificate of Appropriateness (COA) and Variance was approved for the property located at 19 Dixie Boulevard. The development proposal consists of a 674 square foot exterior addition, renovations, new pool, landscaping, hardscaping and Variance request to reduce the side interior setback from 10' to 8.5' on the North side of the property.

You may now proceed to the Building Division to obtain a building permit for the construction of the proposed improvements. Please note that all plans submitted with the building permit application must accurately reflect the improvements within the attached certified plan set. In order to expedite the review of the permit, it is recommended that you verify that the building permit plans match the final certified plans. The status of your building permit may be verified by contacting the Building Division at 561.243.7200.

Attached is a copy of the plans, certified by the Director of the Planning, Zoning, and Building Department. The site plan approval is valid for 24 months, thus expiring on February 7, 2020. Prior to the expiration date of the site plan, 25% of the cost of all improvements associated with the approved development must be constructed in order for this proposal to be considered established. ITEM BEFORE THE BOARD

The item before the Board is consideration of a Certificate of Appropriateness (2017-247) and Variance (2017-246) requests associated with a 674 square foot exterior addition, renovations, new pool, landscaping and hardscaping to the property located at **19 Dixie Boulevard, Del-Ida Park Historic District**, pursuant to Land Development Regulation (LDR) Section 2.4.6(H) and 2.4.7(A).

BACKGROUND & PROJECT DESCRIPTION

The property is located within the R-1-AA (Single Family Residential) zoning district. The 0.16-acre lot measures 50' wide x 140' deep and contains a 1,018 square foot existing single-family residence and 587 square foot guest cottage. The historic structures were built in 1925 and are classified as contributing to the Del-Ida Park Historic District.

According to the City Property cards, the historic structure had a floorplan consisting of five rooms, flat roof covered in gravel, wood frame, and stucco exterior walls. The structure exhibits mission-style architecture.

The subject COA request for exterior renovations and addition to the single-family residence and guest cottage includes:

1. Installation of new impact resistant windows and doors;
2. Paint the structure white with black accents;
3. Construction of a 674 square foot addition connecting the single-family residence and the guest cottage;
4. Construction of a new pool and associated deck;
5. Installation of new exterior light fixtures;
6. Installation of a new emergency generator; and,
7. Reconfiguration of the existing brick paver driveway.

The subject request also includes a variance to allow the proposed addition to encroach 1.5' into the required 10' side interior setback on the North side of the property. The COA and variance request are now before the Board for consideration.

ANALYSIS OF PROPOSAL

Pursuant to Land Development Regulation (LDR) Section 2.4.6(H)(5), prior to approval, a finding must be made that any Certificate of Appropriateness which is to be approved is consistent with Historic Preservation purposes pursuant to Objective A-4 of the Land Use Element of the Comprehensive Plan and specifically with provisions of Section 4.5.1, the Delray Beach Historic Preservation Design Guidelines, and the Secretary of the Interior's Standards for Rehabilitation.

LDR SECTION 4.5.1, HISTORIC PRESERVATION, DESIGNATED DISTRICTS, SITES, AND BUILDINGS

Pursuant to LDR Section 4.5.1(E) - **Development Standards**: all new development or exterior improvements on individually designated historic properties and/or properties located within historic districts shall, comply with the goals, objectives, and policies of the Comprehensive Plan, the Delray Beach Historic Preservation Design Guidelines, the Secretary of the Interior's Standards for Rehabilitation, and the Development Standards of this Section.

Standard 2

The historic character of a property shall be retained and preserved. The removal of historic materials or alteration of features and spaces that characterize a property shall be avoided.

Standard 9

New additions, exterior alterations, or related new construction shall not destroy historic materials that characterize the property. The new work shall be differentiated from the old and

shall be compatible with the massing, size, scale, and architectural features to protect the historic integrity of the property and its environment.

The proposal meets the applicable standards noted above and their intent as the proposed changes ensure an appropriate renovation and addition of the existing historic structure.

The renovations include new aluminum framed (anodized bronze) impact resistant windows and doors, a Mahogany entry door, new exterior light fixtures, construction of a new pool and associated deck, installation of a new emergency generator, and reconfiguration of the brick paver driveway to improve an existing non-conformity. The exterior color scheme will be changed from yellow stucco with dark blue accents to white painted stucco and black accents. The addition will include a new kitchen and living area that connects the single-family residence to the guest cottage. The proposed changes do not destroy historic features that characterize the structure.

Overall, the proposed changes protect the historic integrity of the existing structure and its environment by allowing for modernization and expansion of the existing structure utilizing durable materials.

Pursuant to LDR Section 4.5.1(E)(2)(b)(2) - Major Development.

The subject application is considered "Major Development" as it involves "alteration of a building in excess of 25 percent of the existing floor area, and all appurtenances."

Pursuant to LDR Section 4.5.1(E)(7) - Visual Compatibility Standards: new construction and all improvements to both contributing and noncontributing buildings, structures and appurtenances thereto within a designated historic district or on an individually designated property shall be visually compatible. In addition to the Zoning District Regulations, the Historic Preservation Board shall apply the visual compatibility standards provided for in this Section with regard to height, width, mass, scale, façade, openings, rhythm, material, color, texture, roof shape, direction, and other criteria set forth elsewhere in Section 4.5.1. Visual compatibility for minor and major development as referenced in Section 4.5.1(E)(2) shall be determined by utilizing criteria contained in (a)-(m). Visual compatibility for all development on individually designated properties outside the district shall be determined by comparison to other structures within the site.

Applicable Visual Compatibility Standards

- (a) **Height**: The height of proposed buildings or modifications shall be visually compatible in comparison or relation to the height of existing structures and buildings in a historic district for all major and minor development. For major development, visual compatibility with respect to the height of residential structures, as defined by 4.5.1(E)(2)(a), shall also be determined through application of the Building Height Plane.
- (b) **Front Facade Proportion**: The front facade of each building or structure shall be visually compatible with and be in direct relationship to the width of the building and to the height of the front elevation of other existing structures and buildings within the subject historic district.
- (c) **Proportion of Openings (Windows and Doors)**: The openings of any building within a historic district shall be visually compatible with the openings exemplified by prevailing historic architectural styles of similar buildings within the district. The relationship of the width of windows and doors to the height of windows and doors among buildings shall be visually compatible within the subject historic district.
- (d) **Rhythm of Solids to Voids**: The relationship of solids to voids of a building or structure shall be visually compatible with existing historic buildings or structures within the subject historic district for all development, with particular attention paid to the front facades.
- (g) **Relationship of Materials, Texture, and Color**: The relationship of materials, texture, and color of the facade of a building and/or hardscaping shall be visually compatible with the

predominant materials used in the historic buildings and structures within the subject historic district.

- (j) Scale of a Building:** The size of a building and the building mass in relation to open spaces, windows, door openings, balconies, porches, and lot size shall be visually compatible with the building size and mass of historic buildings and structures within a historic district for all development. To determine whether the scale of a building is appropriate, the following shall apply for major development only:
 - 1.** For buildings wider than sixty percent (60%) of the lot width, a portion of the front façade must be setback a minimum of seven (7) additional feet from the front setback line.
 - 2.** For buildings deeper than fifty percent (50%) of the lot depth, a portion of each side façade, which is greater than one story high, must be setback a minimum of five (5) additional feet from the side setback line.
- (l) Architectural Style:** All major and minor development shall consist of only one (1) architectural style per structure or property and not introduce elements definitive of another style.
- (m) Additions to individually designated properties and contributing structures in all historic districts.** Visual compatibility shall be accomplished as follows:
 - 1.** Additions shall be located to the rear or least public side of a building and be as inconspicuous as possible.
 - 2.** Additions or accessory structures shall not be located in front of the established front wall plane of a historic building.
 - 3.** Characteristic features of the original building shall not be destroyed or obscured.
 - 4.** Additions shall be designed and constructed so that the basic form and character of the historic building will remain intact if the addition is ever removed.
 - 5.** Additions shall not introduce a new architectural style, mimic too closely the style of the existing building nor replicate the original design, but shall be coherent in design with the existing building.
 - 6.** Additions shall be secondary and subordinate to the main mass of the historic building and shall not overwhelm the original building.

The proposed renovation and addition to the single-family residence and guest cottage is appropriate and compatible with the Del-Ida Park Historic District. The height of the addition does not exceed the highest element of the existing residence. The extension of the kitchen component on the North elevation does not alter the front façade proportion. The new windows and doors are compatible with the existing proportion of openings. The exterior color scheme will change from yellow stucco with dark blue accents to white painted stucco and black accents. These changes will not alter the visual compatibility of structure within the Del-Ida Historic District since the existing stucco and semi-smooth texture will remain. The scale of the building will not be substantially altered since the addition will be in exact alignment with the existing kitchen component on the North side of the property nor will the renovation/addition introduce a new architectural style. Replica emblem/motifs will be added to the addition to match the existing emblem/diamond motifs. New barrel tile and a heavy timber eyebrow are proposed on South elevation, East elevation, and West Elevation. These new elements are visually compatible with the historic mission-style of the property.

The overall proposal maintains mission-style architectural details appropriate for the Del-Ida Park Historic District. The proposal meets the intent of the review criteria above; thus, positive findings are made with respect to the sections indicated above.

VARIANCE ANALYSIS

Pursuant to LDR Section 4.3.4(K), required side setbacks within the R-1-AA District are 10'.

The subject request is a variance to allow construction of an addition that connects the single-family residence to the guest cottage to encroach 1.5' into the required 10' side interior setback on the North side of the property.

Pursuant to LDR Section 2.2.6(D), the Historic Preservation Board (HPB) shall act on all variance requests within an historic district, or on a historic site, which otherwise would be acted upon by the Board of Adjustment.

Pursuant to LDR Section 2.4.7(A)(5) Variances, the following findings must be made prior to the approval of a variance:

- (a) That special conditions and circumstances exist which are peculiar to the land, structure, or building involved and which are not generally applicable to other lands, structures, or buildings subject to the same zoning (The matter of economic hardship shall not constitute a basis for the granting of a variance);**
- (b) That literal interpretation of the regulations would deprive the applicant of rights commonly enjoyed by other properties subject to the same zoning;**
- (c) That the special conditions and circumstances have not resulted from actions of the applicant;**
- (d) That granting the variance will not confer onto the applicant any special privilege that is denied to other lands, structures, and buildings under the same zoning. Neither the permitted, nor nonconforming use, of neighborhood lands, structures, or buildings under the same zoning shall be considered grounds for the issuance of a variance;**
- (e) That the reasons set forth in the variance petition justify the granting of the variance, and that the variance is the minimum variance that will make possible the reasonable use of the land, building, or structure; and,**
- (f) That the granting of the variance will be in harmony with the general purpose and intent of existing regulations, will not be injurious to the neighborhood, or otherwise detrimental to the public welfare.**

The property owner has submitted the following justification statement (attached).

"We recognize that LDR Section 4.3, (H), (1): Setbacks address building setback guidelines. The "Side Yard Building Setback Line" requirement for our site is 10', as we are within an R-1-AA zoning district. The rationale behind our request is that keeping our proposed addition ("wing") in exact alignment with the existing Kitchen component on that side (North) of the Floor Plan: it makes the most structural sense (no odd offset), interior layout and flow of the plan sense (no odd offset), allows for an additional 1.5' of area to be used within our Pool area/courtyard, and most importantly – has been tastefully designed so that it has negligible to no negative impact on our immediate next door neighbor.

We feel the intent of the code, in all matters, will not be compromised in any fashion whatsoever!

In conclusion, if granted, the "Variance" would in no way "be contrary to the public interest and where owing to the conditions peculiar to the property and not the result of the actions of the landowner, a literal enforcement of the regulations would result in unnecessary and undue hardship". Furthermore, we feel "that the reasons set forth in the "Variance" petition justify the granting of the "Variance, and we feel that the "Variance" is the minimum "Variance" that will make possible the reasonable use of the land, building, or structure" and finally "that the granting of the

"Variance" will be in (complete) harmony with the general purpose and intent of existing regulations, will not be injurious to the neighborhood, or otherwise detrimental to the public welfare".

For these reasons, the owner respectfully requests that this variance be granted."

The variance is to allow a reduction to the required 10' side interior setback to 8.5' to accommodate the addition that connects the single-family residence to the guest cottage. A paved driveway exists in a portion of this location.

Special conditions and circumstances exist due to the small size of the 50' wide property as well as the historic setting of the site within the Del-Ida Park Historic District. Further, the variance is the minimum necessary to preserve the historic character of the property while allowing for the modernization of the floorplan. It will not significantly diminish the historic character of the site or the district. Literal interpretation of the requirements of the code would alter the historic character and scale of the property as it is situated within the Del-Ida Park Historic District. The variance is necessary to accommodate an appropriate adaptive reuse of the historic structure and site. Finally, the variance is not contrary to the public interest, safety or welfare.

Note: As required by the LDRs, a notice regarding the subject variance request was sent to those property owners located within a 500' radius of the subject property as well as a Special Courtesy Notice to the Del-Ida Park Neighborhood Association.

The submitted justification statements are attached.

ALTERNATIVE ACTIONS

- A. Continue with direction.
- B. Approve Certificate of Appropriateness (2017-247) and Variance requests (2017-246) for the property located at **19 Dixie Boulevard, Del-Ida Park Historic District** by adopting the findings of fact and law contained in the staff report, and finding that the request and approval thereof is consistent with the Comprehensive Plan and meets the criteria set forth in LDR Sections 2.4.6(H)(5), and 2.4.7(A)(5).
- C. Deny Certificate of Appropriateness (2017-247) and Variance requests (2017-246) for the property located at **19 Dixie Boulevard, Del-Ida Park Historic District** by finding that the request and approval thereof is inconsistent with the Comprehensive Plan and does not meet the criteria set forth in LDR Sections 2.4.6(H)(5), and 2.4.7(A)(5).

RECOMMENDATIONS

Certificate of Approval (COA)

Approve the COA 2017-247 for **19 Dixie Boulevard, Del-Ida Park Historic District**, by adopting the findings of fact and law contained in the staff report, and finding that the request and approval thereof meets the criteria set forth in the Land Development Regulations Section 2.4.6(H)(5).

NOTE:

If the COA is approved, the following must be addressed prior to certification:

- 1. That the height dimension of the addition on the North elevation be measured to the top of the parapet.
- 2. That the site plan and floor plan indicate the air conditioning unit, pool equipment, and generator in the same configuration.
- 3. That the dimension of the driveway between the property line and fence (area where vehicles are parked) be indicated.

Variance

Approve the variance to allow a reduction to the required 10' side interior setback to 8.5', based upon positive findings to LDR Section 2.4.7(A)(5).
