OPEN SPACE, PARKS, AND RECREATION

WHAT IS THE OPEN SPACE, PARKS, AND RECREATION ELEMENT?

The Open Space, Parks, and Recreation Element is the City of Delray Beach's plan for providing a high quality system of parks, open space, recreational facilities and programs now and to meet future projected demands and recreation trends.

Open space, parks, and recreation are interconnected to other elements of the Comprehensive Plan. Beyond the provision of leisure and recreational activities, quality parks and recreation programs foster economic benefits by promoting tourism, and revitalizing communities by creating safer, more desirable neighborhoods. Community open spaces expand cultural ties through the provision of public art and the celebration of historic venues by providing a unique sense of place for the community. All of which promotes civic pride and engagement. Parks and open space support sustainability efforts through the protection and preservation of natural resources. Recreational opportunities promote healthier lifestyles and improve the mental and physical wellbeing of the residents and visitors.

Delray Beach is a diverse community whose fabric is a rich blend of cultures, ages, and both seasonal and year-round residents and visitors. While the diverse needs, interests, and experiences of Delray Beach residents enrich the city, it also provides challenges on how to best to serve the varied needs and desires of all residents. To ensure that a priority for a high quality of life remains for current and future generations, it is necessary that the parks, recreation, and open spaces system continually addresses the growing population and demographic changes, and changes in cultural trends and interests.
