

Development Services Department

BOARD ACTION REPORT - APPEALABLE ITEM

Project Name: 145 NE 6th Avenue (2018-089)

Project Location: 145 NE 6th Avenue, Individually Listed to the Local Register of Historic Places

PCN: 12-43-46-16-01-115-0051

Request: Certificate of Appropriateness Board: Historic Preservation Board Meeting Date: July 1, 2020

Board Vote: Approved on a 5-1 vote (Newman-Rocker dissenting and Turner stepped down)

Board Actions:

Approved the Certificate of Appropriateness (2018-089) request associated with the demolition and reconstruction of the existing contributing garage.

Site Plan Technical Items:

1. That the window on the north elevation of the garage be eliminated.

- 2. That the height measurement for the principal structure is correctly illustrated on plan sheet A2.1 to be measured from the average crown of road.
- 3. That the height of the existing structure shall be noted within the site data sheet on plan sheet SP1.1.

Project Description:

The subject 0.45-acre property is located on the east side of NE 6th Avenue between NE 1st Street and NE 2nd Street. The property contains a two-story, Mediterranean Revival style single-family, residence with a one-story detached garage, built circa 1925. The property was added to the Local Register of Historic Places on November 18, 1997 via Ordinance 46-97 as an individually designated property to be known as The Turner House.

The residence and garage were designed by Delray Beach's first registered architect Samuel Ogren and are considered one of finest intact examples of Mediterranean Revival architecture in the City.

The Mediterranean style is characterized by one and two-story structures with stucco finish, wood, stone and concrete decorative accents. The facades are usually asymmetrical in design with multi-level roofs. At the time of the designation, the house and property remained virtually unaltered. The garage is located at the northeast corner of the property adjacent to a north/south alley. The garage was originally constructed as a double garage with the house in 1925. It has a typical flat, pitched roof with decorative terra-cotta tile edging around the stepped parapet wall. The garage originally contained space for two cars, a half bath, laundry tubs and storage. The front elevation was modified by removing one of the original wood pair of garage doors. In their place a single entrance door and window were added. This created a single car garage and a small apartment space. The structure measures at 566.20 square feet. These alterations occurred in 1951 according to the City Property Cards. At a later point in time a small exterior lean-to type shed addition (made out of concrete block) was added to the back (east side) of the garage, which created a covered porch over the back door. The original drawings of the garage and home still exist, and the garage drawing is attached to this report.

The current condition of the garage interior and exterior requires extensive repairs. The garage still retains many original features such as laundry and bathroom sinks and its Dade County Pine ceilings. Several of the original wood windows remain but require repair or replacement as well as the doors. On the north elevation of the garage a small area of the stucco finish has pulled away from the structural members on the interior. The rusted nails have pulled loose from the metal lathe. The foundation also appears to be cracked. Consequently, several of the interior structural members require repair with a Dutchman, sistered structural member, or complete replacement. It also appears the structure requires termite abatement. The later shed roof addition that was added to the back of the garage is in dilapidated condition.

At its meeting of August 5, 2015, the Historic Preservation Board considered COA 2015-198 for the demolition of the garage, as well as a waiver to allow the demolition to occur prior to the issuance of a building permit for the construction of a new accessory structure. The demolition and waiver requests were both denied.

Then, at its meeting of July 6, 2016 the Board considered COA 2016-163 for rehabilitation of the detached garage and partial demolition of the shed addition on the east side of the structure. The proposal involved utilization of the structure for habitable space rather than a garage. The request was approved subject to conditions. The owner submitted a building permit on January 23, 2017 to commence the approved interior alterations. That permit was subsequently closed due to inactivity. The owner and the owner's contractor met with city staff to advise of the poor condition of the structure. The owner then applied for a Certificate of Appropriateness to demolish the existing structure and reconstruct the structure in its original form on the site.

Appealable Item Report

On March 4, 2020, the board reviewed Certificate of Appropriateness (2018-089) request for demolition of the existing one-story contributing detached garage in the rear of the property and reconstruction of a new one-story masonry garage. The Board had concerns regarding the lack of maintenance on the structure that contributed to the significant deterioration of its interior. The Board moved to continue the request with direction as noted to the July 1, 2020 Historic Preservation Board meeting. The applicant has revised the proposal in response to the Board's direction.

Board Comments:

Majority of the members of the board were supportive of the proposal.

Public Comments:

There was one public comment, via call in, that was in support of the proposal.

Associated Actions:

N/A

Next Action:

The HPB action is final unless appealed by the City Commission

HISTORIC PRESERVATION BOARD MEMORANDUM

145 NE 6th Avenue

The item before the Board is in consideration of a Certificate of Appropriateness request associated with the demolition of the existing contributing garage and construction of a new garage for the property located at 145 NE 6th Avenue, Individually Listed on the Local Register of Historic Places.

On March 4, 2020, the Historic Preservation Board reviewed the Certificate of Appropriateness (2018-089) request for demolition of the existing one-story contributing detached garage in the rear of the property and reconstruction of a new one-story masonry garage. The Board had concerns regarding the lack of maintenance of the structure that may have contributed to the deterioration of its interior. There were also questions regarding the proposed new garage and what the differences were between the original garage and the proposed.

The Board moved to continue the request and asked that staff review the Land Development Regulations relating to Affirmative Maintenance and Demolition by Neglect and report to the HPB the requirements of the code. The requirements are listed below:

- (9) Maintenance Requirements for Historic Sites and Buildings; Penalties.
 - (a) Every owner of historic and archeological sites or owner of buildings, structures, improvements and appurtenances within historic districts shall keep in good repair and shall properly maintain both the exterior and site. The owner of a building or structure located within a historic district through the exercise of sufficient and reasonable care shall provide for the maintenance and upkeep of these sites and buildings to prevent destruction and decay as caused by either deterioration or other hazards.
 - (b) In addition to the general standards and guidelines set forth at Subparagraph 4.5.1(E)(5) above, the owner shall preserve a historic structure against decay and deterioration through the correction of the following deficiencies:
 - 1. Facades which may fall and injure the subject or adjoining structure or building, or members of the public.
 - 2. Deteriorated or inadequate foundation, defective or deteriorated flooring or floor supports, deteriorated walls or other vertical structural supports.
 - 3. Members of ceilings, roofs, ceiling and roof supports, or other horizontal members which sag, split or buckle due to defective material or deterioration.
 - 4. Deteriorated or ineffective waterproofing of exterior walls, roofs, foundations, or floors, including broken windows or doors.
 - 5. Presence of signs that would indicate rotting wood or termite infestation.
 - 6. Any fault or defect in the structure or building which renders it structurally unsafe, insufficiently protected from weathering, or not properly watertight.

NOTE: This item is under review and is subject to changes upon further analysis based on comments made by Staff according to the City's Land Development Regulations (LDR) and other department technical reviews. Any comments or objections shall be presented to the approving body during the scheduled meeting or discussed with the project planner in advance.

Memo Date: June 24, 2020 Meeting Date: July 1, 2020

- (c) In the sole discretion of the City, a violation of any of the provisions of subparagraph 4.5.1(E)(9) may be penalized either as set forth in the City of Delray Beach Operating Guidelines Manual for the Neighborhood and Community Services Department, as may be amended from time to time, or additionally by imposing the penalties provided for in Section 37.36 of the City Code of Ordinances which have been authorized pursuant to state law at Chapter 162, F.S.
- (d) Notwithstanding the penalties set forth at above sub-paragraph (c), and in addition to the penalties authorized by this section and the Code of Ordinances, a violation of these maintenance regulations which are determined by the City to be a either a repeat violation, or a serious threat to the public health, safety and welfare; or if the violation is irreparable or irreversible in nature, then in any of these circumstances, the owner may also be subject to the following provisions:
 - 1. Following the determination by the City of violations under one or more of the circumstances set forth above, no permit will be issued for any alteration or new construction affecting such property for a period of five years, other than permits necessary to correct the violation. However, upon presentation of evidence satisfactory to the Historic Preservation Board that the violation has been corrected, any remaining portion of the five-year prohibition on issuance of a permit may be waived. Notwithstanding this waiver, no other provision or penalty of Subparagraph 4.5.1(E)(9) may be waived by the Historic Preservation Board.
 - 2. As a condition for any new land use approval, the owner may be required to rebuild, reconstruct, restore or replicate the structure or object on the property in accordance with applicable standards and development procedures as set forth in Section 4.5.1.
 - 3. The ad valorem tax exemption provided for historic structures or properties under Section 4.5.1 and all historic preservation incentives will not apply to historically designated buildings, structures, landscape features, improvements or sites that are damaged, destroyed, or demolished through either action or inaction of the owner concerning maintenance regulation violations identified in sub-paragraph 4.5.1(E)(9)(b) herein.

The applicant has made minor modifications to the proposed elevation drawings to clarify the proposal by placing the existing and proposed elevations on the same page. There have been no substantive changes to the request.

The request is now before the board for review and action.

BACKGROUND INFORMATION AND PROJECT DESCRIPTION

The subject 0.45-acre property is located on the east side of NE 6th Avenue between NE 1st Street and NE 2nd Street. The property contains a two-story, Mediterranean Revival style single-family, residence with a one-story detached garage, built circa 1925. The property was added to the Local Register of Historic Places on November 18, 1997 via Ordinance 46-97 as an individually designated property to be known as The Turner House.

Dr. Ambrose A. Plotner commissioned Samuel Ogren to design the house in 1925, the commission was considered rather unusual in that Dr. Plotner was 83 years old at the time. Also, in 1925, Mr. and Mrs. Charles Turner moved to Delray from their home in Oklahoma, Charles and Ocie Turner met and became friends with Dr. Plotner and agreed to move into the house as caretakers. A world traveler, the doctor spent a great deal of time out of the country, the opportunity to have the Turners as custodians of the new house while he was abroad was a mutually congenial arrangement. Ambrose Plotner spent a part of each of the next seven years in Delray and died in 1932 at the age of 90. Upon his death the Turners purchased the house in 1932 from his estate. Charles and Ocie Turner remained in the house until their passing when their son, Charles inherited the property. Charles passed in 2008. Today, the property is owned by Allison and Nancy Turner, Charles's daughter and wife and they are considered a Legacy Family to the property given their involvement in the property's history.

- Photographs

The residence and garage were designed by Delray Beach's first registered architect Samuel Ogren and are considered one of finest intact examples of Mediterranean Revival architecture in the City.

Samuel Ogren was Delray Beach's first and most prolific registered architect. Born in China in 1899 of Swedish missionary parents, Mr. Ogren had no formal architectural training. He was apprenticing in the West Palm Beach architectural firm of William Manley King in 1924 when he designed his first building in Delray, the Mediterranean Revival residence at 704 N. Swinton Avenue. City officials, impressed with the design, offered him the position of City Architect. Ogren went to Tallahassee, took, and passed the State's architectural examination, and moved his family to Delray in 1924. During the 1920's Mr. Ogren designed mostly in the Mediterranean Revival style and contributed to its popularity throughout the city. Noted for his beautifully executed designs, graceful facades, craftsmanship and attention to detail, Mr. Ogren was commissioned to design the Delray High School and Gymnasium in 1926, both buildings are listed in the National Register of Historic Places. Some of his other notable buildings in the Mediterranean Revival style are the Marine Villas, Casa Abriga, and the Arcade Tap Room. As the popularity of the Mediterranean Revival style waned at the onset of the Great Depression, Mr. Ogren's designs reflected the changing public taste in architecture. Colonial Revival, Monterey and Art Moderne styles are all to be found in his later work through the City. Ogren designed more than 250 buildings in the City between 1924 and his retirement in 1955.

The Mediterranean style is characterized by one and two-story structures with stucco finish, wood, stone and concrete decorative accents. The facades are usually asymmetrical in design with multi-level roofs. At the time of the designation, the house and property remained virtually unaltered. The garage is located at the northeast corner of the property adjacent to a north/south alley. The garage was originally constructed as a double garage with the house in 1925. It has a typical flat, pitched roof with decorative terra-cotta tile edging around the stepped parapet wall. The garage originally contained space for two cars, a half bath, laundry tubs and storage. The front elevation was modified by removing one of the original wood pair of garage doors. In their place a single entrance door and window were added. This created a single car garage and a small apartment space. The structure measures at 566.20 square feet. These alterations occurred in 1951 according to the City Property Cards. At a later point in time a small exterior lean-to type shed addition (made out of concrete block) was added to the back (east side) of the garage, which created a covered porch over the back door. The original drawings of the garage and home still exist, and the garage drawing is attached to this report.

In 1998, Charles Turner made extensive improvements to the residence. The foundations on the south and east elevations were failing and needed total reconstruction. The failing foundation had caused many of the wood windows and frames of the residence to crack and deteriorate. The replacement windows are historically correct reproductions of the originals. A new electrical system was installed as well as a new clay tile roof.

The current condition of the garage interior and exterior requires extensive repairs. The garage still retains many original features such as laundry and bathroom sinks and its Dade County Pine ceilings. Several of the original wood windows remain but require repair or replacement as well as the doors. On the north elevation of the garage a small area of the stucco finish has pulled away from the structural members on the interior. The rusted nails have pulled loose from the metal lathe. The foundation also appears to be cracked. Consequently, several of the interior structural members require repair with a Dutchman, sistered structural member, or complete replacement. It also appears the structure requires termite abatement. The later shed roof addition that was added to the back of the garage is in dilapidated condition.

At its meeting of August 5, 2015, the Historic Preservation Board considered COA 2015-198 for the demolition of the garage, as well as a waiver to allow the demolition to occur prior to the issuance of a building permit for the construction of a new accessory structure. The demolition and waiver requests were both denied.

Then, at its meeting of July 6, 2016 the Board considered COA 2016-163 for rehabilitation of the detached garage and partial demolition of the shed addition on the east side of the structure. The proposal involved utilization of the structure for habitable space rather than a garage. The request was approved subject to conditions. The owner submitted a building permit on January 23, 2017 to commence the approved interior

alterations. That permit was subsequently closed due to inactivity. The owner and the owner's contractor met with city staff to advise of the poor condition of the structure. The owner then applied for a Certificate of Appropriateness to demolish the existing structure and reconstruct the structure in its original form on the site.

The request before the board is a Certificate of Appropriateness for demolition of the existing one-story contributing detached garage in the rear of the property and reconstruction of a new one-story masonry garage.

REVIEW AND ANALYSIS

Pursuant to Land Development Regulation (LDR) Section 2.4.6(H)(5), prior to approval, a finding must be made that any Certificate of Appropriateness which is to be approved is consistent with Historic Preservation purposes pursuant to Objective A-4 of the Land Use Element of the Comprehensive Plan and specifically with provisions of Section 4.5.1, the Delray Beach Historic Preservation Design Guidelines, and the Secretary of the Interior's Standards for Rehabilitation.

Pursuant to Land Development Regulation (LDR) Section 2.4.5(I)(5), <u>Architectural (appearance)</u> <u>elevations</u>, the Site Plan Review and Appearance Board or the Historic Preservation Board, as appropriate, may approve subject to conditions or deny architectural elevations or plans for a change in the exterior color of a building or structure, or for any exterior feature which requires a building permit.

ZONING AND USE REVIEW

Pursuant to LDR Section 4.4.13(A)(1) – Central Business District (CBD) Development Standards: Central Core Sub-district. The Central Core Sub-district regulations are intended to result in development that preserves the downtown's historic moderate scale, while promoting a balanced mix of uses that will help the area evolve into a traditional, self-sufficient downtown. Residential development is permitted at a density which fosters compact, pedestrian oriented growth that will support downtown businesses.

Pursuant to LDR Section 4.4.13(C)(1)- <u>Allowable Uses</u> -Principal, accessory, and conditional uses. Table 4.4.13(A) identifies the allowable principal, accessory, and conditional uses for each area of the CBD.

A single-family dwelling (occupied by owner, proprietor, or employee of the principal use) is allowed as an Accessory Use within the Central Core Sub-District. The historic property currently exists as a single-family residence as the Primary Use and is an existing non-conformity within the district.

Article 4.4 Base Zoning District Regulations

Pursuant to LDR Section 4.3.4(K), Development Standards, properties located within the CBD zoning district shall be developed according to the requirements noted in the chart below:

DEVELOPMENT STANDARDS		REQUIRED	EXISTING	PROPOSED	
Minimum Lot Size:		0 sq. ft.	19501 sq. ft.	no change	
Minimum Lot Width & Frontage:		0'	150.08	no change	
Minimum Lot Depth:		0'	130.00	no change	
GARAGE					
Required Setbacks:	Front (West)	10.0'	95.36'	91.88'	
Left Side Interior (North)		0'	4.6' – 4.9'	3.18'- 3.59'	
Rear (East)		10.0'	1.8'	10.0"	
Building Height:		38'	12'3"	no change	

[†] Existing Non-Conformity

It is noted that the height measurement for the principal structure is not correctly illustrated on plan sheet A2.1 as it is measured from the finished floor and not the average crown of road. Further, the height of the existing

structure shall be noted within the site data sheet on plan sheet SP1.1. These items are attached as Site Plan Technical Items.

Pursuant to LDR Section 4.4.13(D)(1)(b)(2) Configuration of buildings – Standards for CBD – building placement – Where development may build with no side setback, the following limitations also apply:

b. Buildings with openings, including doors, windows, and glass wall materials, facing an interior side property line must setback a minimum of five feet from the property line.

The window on the north elevation shall be eliminated given the proposed structure is proposed at less than five feet from the north property line. This item is attached as a site plan technical item.

Pursuant to LDR Section 4.4.3(H)(1) <u>Special regulations</u>. The height of accessory structures shall not exceed the height of the associated principal structure. Screen enclosures without a solid roof are excluded from this limit.

The height of the accessory structure will not exceed the height of the principal structure.

LDR SECTION 4.5.1

HISTORIC PRESERVATION: DESIGNATED DISTRICTS, SITES, AND BUILDINGS

Pursuant to LDR Section 4.5.1(E), <u>Development Standards</u>, all new development or exterior improvements on individually designated historic properties and/or properties located within historic districts shall, comply with the goals, objectives, and policies of the Comprehensive Plan, the Delray Beach Historic Preservation Design Guidelines, the Secretary of the Interior's Standards for Rehabilitation, and the Development Standards of this Section

Pursuant to LDR Section 4.5.1(E)(2)(c)(4) – Major Development.

The subject application is considered "Minor Development" as it involves "alteration of less than 25 percent of the existing floor area of the building and all appurtenances."

Pursuant to LDR Section 4.5.1(E)(4) – Alterations: in considering proposals for alterations to the exterior of historic buildings and structures and in applying development and preservation standards, the documented, original design of the building may be considered, among other factors.

The existing structure, and its remaining original form, has been considered with respect to the proposed garage improvements.

Pursuant to LDR Section 4.5.1(E)(5) - Standards and Guidelines: a historic site, building, structure, improvement, or appurtenance within a historic district shall only be altered, restored, preserved, repaired, relocated, demolished, or otherwise changed in accordance with the Secretary of the Interior's Standards for Rehabilitation, and the Delray Beach Historic Preservation Design Guidelines, as amended from time to time.

Standard 1

A property shall be used for its historic purpose or be placed in a new use that requires minimal change to the defining characteristics of the building and its site and environment.

Standard 2

The historic character of a property shall be retained and preserved. The removal of historic materials or alteration of features and spaces that characterize a property shall be avoided.

Standard 3

Each property shall be recognized as a physical record of its time, place, and use. Changes that create a false sense of historical development, such as adding conjectural features or architectural elements from other buildings, shall not be undertaken.

Standard 4

Most properties change over time; those changes that have acquired historic significance in their own right shall be retained and preserved.

Standard 5

Distinctive features, finishes, and construction techniques or examples of craftsmanship that characterize a historic property shall be preserved.

Standard 6

Deteriorated historic features shall be repaired rather than replaced. Where the severity of deterioration requires replacement of a distinctive feature, the new feature shall match the old in design, color, texture, and other visual qualities and, where possible, materials. Replacement of missing features shall be substantiated by documentary, physical, or pictorial evidence.

Standard 7

Chemical or physical treatments, such as sandblasting, that cause damage to historic materials shall not be used. The surface cleaning of structures, if appropriate, shall be undertaken using the gentlest means possible.

Standard 8

Significant archeological resources affected by a project shall be protected and preserved. If such resources must be disturbed, mitigation measures shall be undertaken.

Standard 9

New additions, exterior alterations, or related new construction shall not destroy historic materials that characterize the property. The new work shall be differentiated from the old and shall be compatible with the massing, size, scale, and architectural features to protect the historic integrity of the property and its environment.

Standard 10

New additions and adjacent or related new construction shall be undertaken in such a manner that if removed in the future, the essential form and integrity of the historic property and its environment would be unimpaired.

Standard 1, 2, 3, 5, 9, & 10 are applicable. The proposal includes the demolition of the contributing detached stucco over wood frame garage located in the rear (northeast) side of the property and reconstruction of a new one-story masonry garage. The applicant is requesting demolition of the contributing structure due to its deteriorated condition, which would require a severe amount of repair to its interior, exterior, and foundation in order to continue use as an adequate parking area for the residence.

The existing garage is simple and rectangular in form with a flat barrel tile roof, one 8' garage door on the front (west) elevation, entry doors located on the front (west) and rear (east) facades, and 5 single hung windows. The proposed front (west) elevation will feature two 8' x 8' overhead garage doors designed to match the façade as it was originally constructed. This style is complimentary to the main structure and will be historically similar to the original construction of the garage. The proposed garage is similar in style to the existing stucco main residence. The reconstructed structure is proposed to be the same height as the existing garage, which does not currently exceed the overall height of the main structure.

The roof of the proposed garage is a flat roof with barrel tile accents around the edges of the parapet, which will be a reconstruction of the style of the original garage. This design will preserve the visual integrity of the historic site.

The existing garage currently does not conform to the required 10' rear setback on the east side of the property as it sits 1.8' from the east property line. The reconstructed garage will be built to meet the required 10' rear

setback, therefore eliminating the existing setback non-conformity of the one-story structure. The proposed garage will be built in the same general location as the original but will add an additional 80 sq. ft. to the north and west sides of the structure in order for the structure to accommodate modern size vehicles.

The accessory garage has sustained a large amount of deterioration throughout the entire structure that has continued into further decline over the years. The attached documentation describes the condition of the structure as beyond repair. The proposed reconstruction of the one-story garage is not anticipated to harm the historic integrity of the site as it will consist of the same Mediterranean Revival architectural style, materials such as barrel tile roof, stucco façade, as well the same design features as the original. The reconstruction of the garage can help to revitalize the site and bring it out of its current deteriorated state. The reconstructed one-story garage can be considered compatible with the two-story main structure on the property.

Pursuant to LDR Section 4.5.1(E)(7) - Visual Compatibility Standards: new construction and all improvements to both contributing and noncontributing buildings, structures and appurtenances thereto within a designated historic district or on an individually designated property shall be visually compatible. In addition to the Zoning District Regulations, the Historic Preservation Board shall apply the visual compatibility standards provided for in this Section with regard to height, width, mass, scale, façade, openings, rhythm, material, color, texture, roof shape, direction, and other criteria set forth elsewhere in Section 4.5.1. Visual compatibility for minor and major development as referenced in Section 4.5.1(E)(2) shall be determined by utilizing criteria contained in (a)-(m) below.

- a. Height: The height of proposed buildings or modifications shall be visually compatible in comparison or relation to the height of existing structures and buildings in a historic district for all major and minor development. For major development, visual compatibility with respect to the height of residential structures, as defined by 4.5.1(E)(2)(a), shall also be determined through application of the Building Height Plane.
- b. Front Facade Proportion: The front facade of each building or structure shall be visually compatible with and be in direct relationship to the width of the building and to the height of the front elevation of other existing structures and buildings within the subject historic district.
- c. Proportion of Openings (Windows and Doors): The openings of any building within a historic district shall be visually compatible with the openings exemplified by prevailing historic architectural styles of similar buildings within the district. The relationship of the width of windows and doors to the height of windows and doors among buildings shall be visually compatible within the subject historic district.
- d. Rhythm of Solids to Voids: The relationship of solids to voids of a building or structure shall be visually compatible with existing historic buildings or structures within the subject historic district for all development, with particular attention paid to the front facades.
- e. Rhythm of Buildings on Streets: The relationship of buildings to open space between them and adjoining buildings shall be visually compatible with the relationship between existing historic buildings or structures within the subject historic district.
- f. Rhythm of Entrance and/or Porch Projections: The relationship of entrances and porch projections to the sidewalks of a building shall be visually compatible with existing architectural styles of entrances and porch projections on existing historic buildings and structures within the subject historic district for all development.
- g. Relationship of Materials, Texture, and Color: The relationship of materials, texture, and color of the facade of a building and/or hardscaping shall be visually compatible with the predominant materials used in the historic buildings and structures within the subject historic district.
- h. Roof Shapes: The roof shape, including type and slope, of a building or structure shall be visually compatible with the roof shape of existing historic buildings or structures within the subject historic district. The roof shape shall be consistent with the architectural style of the building.

- i. Walls of Continuity: Walls, fences, evergreen landscape masses, or building facades, shall form cohesive walls of enclosure along a street to ensure visual compatibility with historic buildings or structures within the subject historic district and the structure to which it is visually related.
- j. Scale of a Building: The size of a building and the building mass in relation to open spaces, windows, door openings, balconies, porches, and lot size shall be visually compatible with the building size and mass of historic buildings and structures within a historic district for all development. To determine whether the scale of a building is appropriate, the following shall apply for major development only:
 - a. For buildings wider than sixty percent (60%) of the lot width, a portion of the front façade must be setback a minimum of seven (7) additional feet from the front setback line:
 - b. For buildings deeper than fifty percent (50%) of the lot depth, a portion of each side façade, which is greater than one story high, must be setback a minimum of five (5) additional feet from the side setback line:
- k. Directional Expression of Front Elevation: A building shall be visually compatible with the buildings, structures, and sites within a historic district for all development with regard to its directional character, whether vertical or horizontal.
- I. Architectural Style: All major and minor development shall consist of only one (1) architectural style per structure or property and not introduce elements definitive of another style.
- m. Additions to individually designated properties and contributing structures in all historic districts: Visual compatibility shall be accomplished as follows:
 - 1. Additions shall be located to the rear or least public side of a building and be as inconspicuous as possible.
 - 2. Additions or accessory structures shall not be located in front of the established front wall plane of a historic building.
 - 3. Characteristic features of the original building shall not be destroyed or obscured.
 - 4. Additions shall be designed and constructed so that the basic form and character of the historic building will remain intact if the addition is ever removed.
 - 5. Additions shall not introduce a new architectural style, mimic too closely the style of the existing building nor replicate the original design but shall be coherent in design with the existing building.
 - 6. Additions shall be secondary and subordinate to the main mass of the historic building and shall not overwhelm the original building.

The Visual Compatibility Standards require "Additions to be secondary and subordinate to the main mass of the historic building and shall not overwhelm the original building". The proposed one-story garage addition will be reconstructed in the same location to the rear of the property behind the principal structure. The garage will be slightly visible from the street and is proposed to be a one-story structure where the principal structure is a two-story structure. The height of the structure is equal to that of the original garage proposed for demolition. Thus, the proposed one-story structure will be secondary and subordinate to the main structure.

The Texture and Color of the new garage will be visually compatible with the main structure as well as the district. Specifically, the proposal includes similar exterior architectural elements such as the use of heavy stucco, barrel roof tiles, overhead garage doors with a barn door appearance, and the structure will be painted in an off-white color with a light brown trim to match the principle structure.

Architectural Elevations Analysis

Pursuant to LDR Section 4.6.18(E), Criteria for Board Action, the following criteria shall be considered by the Historic Preservation Board (HPB) in the review of plans for building permits. If the following criteria are not met, the application shall be disapproved:

1. The plan or the proposed structure is in conformity with good taste, good design, and in general contributes to the image of the City as a place of beauty, spaciousness, harmony, taste, fitness, broad vistas, and high quality.

- 2. The proposed structure, or project, is in its exterior design and appearance of quality such as not to cause the nature of the local environment or evolving environment to materially depreciate in appearance and value.
- 3. The proposed structure, or project, is in harmony with the proposed developments in the general area, with the Comprehensive Plan, and with the supplemental criteria which may be set forth for the Board from time to time.

The development proposal is also subject to the requirement for Visual Compatibility pursuant to LDR Section 4.5.1(E)(7), which provides for a specific analysis of the historic exterior of the proposal. The proposed reconstruction of the accessory structure will help to keep the same historic character of the Mediterranean Revival style property. The proposed garage has been designed to be a reconstruction of the original, which will be in harmony with the existing home and surrounding area.

The proposal presents design elements that will contribute to the general area, will maintain the architectural harmony, compatibility, and quality of the neighborhood. It will not cause the nature of the local environment or evolving environment to materially depreciate in appearance and value.

Comprehensive Plan

Pursuant to the Future Land Use Element, Objective A-4, the redevelopment of land and buildings shall provide for the preservation of historic resources. The objective shall be met through continued adherence to the City's Historic Preservation Ordinance and, where applicable, to architectural design guidelines through the following policies:

Future Land Use Policy A-4.1 Prior to approval or recommending approval of any land use or development application for property located within a historic district or designated as a historic site, the Historic Preservation Board must make a finding that the requested action is consistent with the provisions of Section 4.5.1 of the Land Development Regulations relating to historic sites and districts and the "Delray Beach Design Guidelines".

The development proposal involves demolition of an existing one-story garage to be replaced with a reconstruction of the original one-story garage. The footprint of the proposed garage will be 80 sq. ft. larger in size as the original and will be shifted slightly on the lot in order to conform to the 10' rear setback requirement. The reconstruction of the garage will help to strengthen and maintain the historic integrity of the home and the district. The proposal can be found to be consistent with the requirements of the Comprehensive Plan and the request can be considered consistent with the provisions of LDR Section 4.5.1 relating to historic sites and districts as well as the "Delray Beach Historic Preservation Design Guidelines".

DEMOLITION ANALYSIS

Pursuant to LDR Section 4.5.1(F), Demolitions – Demolition of historic or archaeological sites, or buildings, structures, improvements and appurtenances within historic districts shall be regulated by the Historic Preservation Board and shall be subject to the following requirements:

- 1. No structure within a historic district or on a historic site shall be demolished before a Certificate of Appropriateness has been issued pursuant to Section 2.4.6(H).
- 2. The application for a Certificate of Appropriateness for demolition must be accompanied by an application for a Certificate of Appropriateness for alterations to the structure or the redevelopment of the property.
- 3. Demolition shall not occur until a building permit has been issued for the alterations or redevelopment as described in the applicable Certificate of Appropriateness.
- 4. All structures approved for demolition and awaiting issuance of a building permit for the alterations or redevelopment shall be maintained so as to remain in a condition similar to that which existed at time that the Certificate of Appropriateness for demolition was approved unless the Chief Building Official determines that an unsafe building condition exists in accordance with Section 4.5.3(G).
- 5. A Certificate of Appropriateness for demolition of 25 percent or more of contributing or individually designated structure shall be subject to the following additional requirements:

- 1. A demolition plan shall accompany the application for a Certificate of Appropriateness for demolition. The plan shall illustrate all portions of the existing structure that will be removed or altered.
- 2. The Certificate of Appropriateness for demolition and the Certificate of Appropriateness for alternation or redevelopment shall meet the "Additional Public Notice" requirements of LDR Section 2.4.2(B)(1)(j).
- 6. The Board upon a request for demolition by a property owner, shall consider the following guidelines in evaluating applications for a Certificate of Appropriateness for demolition of designated historic sites, historic interiors, or buildings, structures, or appurtenances within designated historic districts;
 - (a) Whether the structure is of such interest or quality that it would reasonably fulfill criteria for designation for listing on the national register.
 - (b) Whether the structure is of such design, craftsmanship, or material that it could be reproduced only with great difficulty or economically nonviable expense.
 - (c) Whether the structure is one of the last remaining examples of its kind in the designated historic district within the city.
 - (d) Whether retaining the structure would promote the general and value of a particular culture and heritage.
 - (e) Whether there are approved plans for immediate reuse of the property if the proposed demolition is carried out, and what effect those plans will have on the historic district designation or the individual designation of the property.
- 7. No decision of the Board shall result in undue economic hardship for the property owner. The Board shall determine the existence of such hardship in accordance with the definition of undue economic hardship found in Section 4.5.1(H).
- 8. The Board's refusal to grant a Certificate of Appropriateness requested by a property owner for the purpose of demolition will be supported by a written statement describing the public interest that the Board seeks to preserve.
- 9. The Board may grant a certificate of appropriateness as requested by a property owner, for demolition which may provide for a delayed effective date. The effective date of the certificate will be determined by the Board based on the relative significance of the structure and the probable time required to arrange a possible alternative to demolition. The Board may delay the demolition of designated historic sites and contributing buildings within historic districts for up to six months while demolition of non-contributing buildings within the historic district may be delayed for up to three months.
- 10. <u>Request for demolition justification statement.</u> A justification statement shall accompany the application for a Certificate of Appropriateness for demolition of any contributing structure in a historic district or individually designated historic structure. The justification statement must include the following:
 - (a) A certified report from a registered architect or engineer which provides documentation explaining that the building is structurally unsound and is damaged beyond the ability to repair it at a reasonable cost. The report must include photographs to substantiate the damage.
 - (b) A certified report from an engineer, architect, general contractor, or other qualified professional which documents the projected cost of repairing the structure and returning it to a safe and habitable condition.
 - (c) An appraisal of the property in its current condition, its value as vacant land and its potential value as a preserved and restored historic property.
 - (d) Documentation that reasonable efforts have been made to find a suitable alternate location for the structure within the City of Delray Beach to which the contributing/individually designated historic structure could be safely relocated.
 - (e) Documentation that the applicant or property owner has taken such steps as it deems necessary to preserve the structure requested for demolition including consultation with community groups, public agencies, and interested citizens, recommendations for

acquisition of property by public or private bodies, or agencies and exploration of the possibility of moving one or more structures or other features.

11. Salvage and recordation of historic structures.

- (a) The property owner shall contact the Delray Beach Historical Society for the purpose of salvaging and preserving specified classes of building materials, architectural details and ornaments, fixtures, and the like for reuse in the restoration of the other historic properties. Confirmation of such efforts shall be provided in a written statement and submitted with the other demolition application prior to consideration by the Historic Preservation Board.
- (b) The Board may, with the consent of the property owner, request that the Delray Beach Historical Society, or the owner, at the owner's expense, record the architectural details for archival purposes prior to demolition.
 - i. The recording may include, but shall not be limited to photographs, documents and scaled architectural drawings to include elevations and floor plans.
 - ii. One copy of the recording shall be submitted to the City's Planning and Zoning Department, and one copy shall be submitted to the Delray Beach Historical Society for archiving purposes.

The applicant has provided reports and documentation regarding the present condition of the structure, the economic feasibility to maintain the structure, and an appraisal of the property. This information is included in the attachments. It is noted that the documentation does not permit the demolition to occur, but it permits a demolition request of a contributing structure to be considered by the Historic Preservation Board.

A structural Engineer report for the property shows extensive moisture, rotting, and deterioration of wood throughout the roof and interior walls. The report also notes active cracking of the concrete slab foundation. Photographs to substantiate these comments are also included. It was determined by the report that "life and service expectations of the building structure is beyond repair" and that efforts to preserve the existing garage is not structurally feasible in its current condition.

The applicant has also included documentation of efforts made to find another suitable location for the structure. Unfortunately, there were no responses accepting the garage. The documentation (report from Stuart & Shelby Development, Inc. and photographs) submitted indicates that relocation of the structure would be unlikely given the deteriorated state of the structure and that it might not be stable enough to endure the process of a move. The cost analysis of the proposed demolition and reconstruction of the detached garage was determined to be the cost-effective solution instead of repairing the structure.

OPTIONAL BOARD MOTIONS FOR ACTION ITEMS

- A. Move to continue with direction
- B. Approve Certificate of Appropriateness (2018-089), request for the property located at **145 NE 6th Avenue**, **Individually Listed to the Local Register of Historic Places**, by finding that the request and approval thereof is consistent with the Comprehensive Plan and meets the criteria set forth in the Land Development Regulations.

Site Plan Technical Items:

- 1. That the window on the north elevation of the garage be eliminated.
- 2. That the height measurement for the principal structure is correctly illustrated on plan sheet A2.1 to be measured from the average crown of road.
- 3. That the height of the existing structure shall be noted within the site data sheet on plan sheet SP1.1.
- C. Deny Certificate of Appropriateness (2018-089), requests for the property located at **145 NE 6th Avenue**, **Individually Listed to the Local Register of Historic Places**, by finding that the request is inconsistent with the Comprehensive Plan and does not meet the criteria set forth in the Land Development Regulations.

REFERENCE:

Investigation and evaluation of existing one-story standing alone wood frame building structure with shallow foundation, at the aforementioned address

Gentlemen;

This letter summarizes our observations and conclusion after a walk-through visual survey conducted on May 31, 2017.

We examined the condition of existing structural roof rafters, exterior and interior load bearing wall systems and their connections and the foundation of the building.

1. OBSERVATIONS

The following general observations were noted during the inspection;

- i. Excessive moisture, stain, rotting, section loss and fully decayed wood members were encountered throughout roof and wall structure members
- ii. Moisture barrier underlayment on the exterior walls were totally eroded
- iii. Wood Beams and Headers were severely notched, cut and deteriorated
- iv. Exterior Wood Wall base plates and their connections were totally eroded
- v. Wood Header, Jams and Bucks around window and door openings were severely damaged from constant water intrusion.
- vi. Excessive Deflections observed at flat roof rafter.
- vii. There were no forms of fastening or nailing at wall to roof rafter and wall to foundation connections (typical at perimeter). There was no continuous load path from roof to foundation.

ENGINEERING AND CONSULTING SERVICES 19528 Sedgefield Terrace, Boca Raton, FL 33498 (561) 756 4106 * fax (561) 479 3743 * engplus@cs.com * C.A. # 26538

- viii. There were missing/eroded studs at exterior wood frame walls
 - i. Water damage was seemed active throughout the building
 - ix. Lateral load resisting system of the overall roof and wall diaphragm system and sheathing did not exist. This condition weakens lateral stability of the members and minimize resistance to any wind event. Since overall bracing system is inadequate, buckling of roof joists and walls is certain during a large out of plane rotating force.
 - x. Active cracks were visible at the concrete slab up to ½" wide. Crack pattern was continuous and interconnected throughout the building foundations. Separations in crack joints were major and consistent. Cracks showed signs of out of plane shift and characteristics of distress on structural integrity of foundation system.

2. CONCLUSION

One-story standing alone wood frame building with shallow foundation at "145 NE 6th Ave Delray Beach" is inspected in order to investigate overall structural condition and integrity of the building. As pointed out at observation section of the report, severe damage to wood members and concrete slab foundation are encountered. Overall condition of the structural members and their connections are totally compromised and their condition is below the level of basic safe environment for occupation. After the inspection, concern raised about the lateral stability and the performance of the building even under potentially low speed wind event. It is our conclusion that, life and service expectations of the building structure is beyond repair. It should be emphasized that any effort for retrofitting and strengthening will not be adequate enough to structurally utilize the existing conditions.

The observations and recommendations contained in this letter represent our professional opinions. Engineering Plus arrived these opinions in accordance with currently accepted engineering practices and applied current local building code at this time and for this location.

Please feel free to contact me with any questions or comments you may have concerning this report.

Re: Turner Residence Garage Cost Analysis

Ms. Hoyland;

At your request, we are providing the following cost analysis for your review

- 1) Demolition of existing structure and build new per plans by David Frank
 Based on proposed plans for the new garage and including demolition, site prep and all
 work required to complete the new garage with anticipate this cost to be \$95,000 \$105,000
- 2) Rebuild existing structure. This building received and engineers report that says it is an unsafe structure and the City of Delray Beach Building Official tagged the building. The slab/ foundation are broken and need to be replaced, the perimeter walls are rotten along with some of the roof structure. The only thing holding this building together is the stucco. As with the Historic Franklin house and Historic Waterhouse, attempts to save walls did not work. For the purpose of providing this cost analysis for us to try and support the roof while replacing the slab and rebuilding the perimeter walls, then rebuilding the roof structure as needed and completing the remaining restoration we anticipate this cost would be \$160,000-\$180,000 and in the end you would basically have a new building anyway

Please let us know if any more information is required

RE: Turner Residence 145 NE 6th Avenue

To whom it may concern;

As a General Contractor building in Florida since 1980 I have built and renovated thousands of homes. Over the years I have worked on maybe 10 historic homes, some of which were built in the 1920's where there was no foundation and the lumber sat right on the ground. In each case we found that efforts to save the home failed as walls fell apart when trying to move them to put a foundation under them.

If the case of the detached garage that accompanies the main home, it was built on a slab and not a crawl space and the walls have sat at below grade for all these years with only stucco separating them from water seepage. The slab itself is actually broken, not just cracked and the bottom plate and walls are falling apart.

It is my personal opinion that any effort to try and move this structure will fail and it will fall down. We had a similar case with the historic Franklin Home in the West Settlers District and also the Historic Waterhouse, which we ultimately rebuilt both entire homes starting with a new foundation at the proper grade.

I may be reached at 561-809-1266 or chuckh@stuartandshelby.com if you should need any further information.

Justification Statement

The current request is for the demolition of the individually designated, contributing detached garage. We have developed plans to rebuild the two-car garage

The Turner Home was added to the Delray Beach Local Register of Historic Places, a listing and a means by which to identify, classify, and recognize buildings, sites, structures, objects and districts that are architecturally and archeologically significant. Charles W. Turner, (the current owner's father), had the historic residence individually designated on the Delray Beach Local Register of Historic Places in 1997, as he was concerned with the escalating development in the area. In his letter dated August 24, 1997 to the City's Preservation Planner he stated he wanted "to rehabilitate the property so that it remain a part of Delray's future."

The Turner family has been associated with the home since they purchased it in 1932. The circa 1925 residence and garage were designed by Delray Beach's first registered architect Samuel Ogren. It is considered one of finest intact examples of Mediterranean Revival architecture in the City. The style is characterized by one and two story structures with stucco finish, wood, stone and concrete decorative accents. The facades are usually asymmetrical in design with multi-level roofs. At the time of the designation, the house remained virtually unaltered but the garage had been altered in 1951 according to the City Property Cards. The front elevation was modified by removing one of the original wood bi-fold pair of garage doors. In their place a single door and window were added. This created a single car garage and small apartment space.

As described in the (adopted) two-page designation report, "A double garage, with a flat roof and terra-cotta tile trim on top of the parapet, was constructed with the house in 1925 and is located on the northeast corner of the property. The garage contained space for two cars, a half bath and laundry tubs. The garage has been modified by the removal of one set of garage doors." The front elevation was modified by removing one of the original wood bi-fold pair of garage doors. In their place a single door and window were added. This created a single car garage and small apartment space. The garage

measures at 566.20 square feet of a total of 4,439 square feet of the main house and garage combined.

In 2015, when we started this process, we felt that due to the fact that the garage sits on the ground with no crawl space (unlike the main house), the building was more affected by weather and conditions than the main house. Upon asking for demolition at that point, we were denied due to not having a plan for the property. We returned with plans to renovate the garage hoping for the best with the structure but when our General Contractor, Stuart and Shelby, started to open up the walls and more importantly rip the flooring out of the apartment, we realized that the foundation was severely damaged and attempting to fix it was going to be a financial hardship and potentially couldn't be salvaged.

We have attached the following statements to include with the justification statement for demolition pursuant to LDR 4.5.1(F):

- 1) Structural Engineer Report from 6/5/17
- 2) The City of Delray Beach Code Enforcement Report on Tagging the building unsafe on 6/6/17
- 3) Certified report from Stuart & Shelby, a General Contractor, detailing a projected cost to repair the building.
- 4) Appraisal of the property in its current condition, its value as a vacant land and potential value as a preserved and restored historic property
- 5) Documentation that we attempted to find another location
- 6) Certified Letter from a General Contractor, Stuart & Shelby, stating that the building will fall apart if the move is attempted

We have plans to rebuild the garage using much of the same architectural features of the original structure. We plan to be in line with the Delray Beach Historic Preservation Design Guidelines.

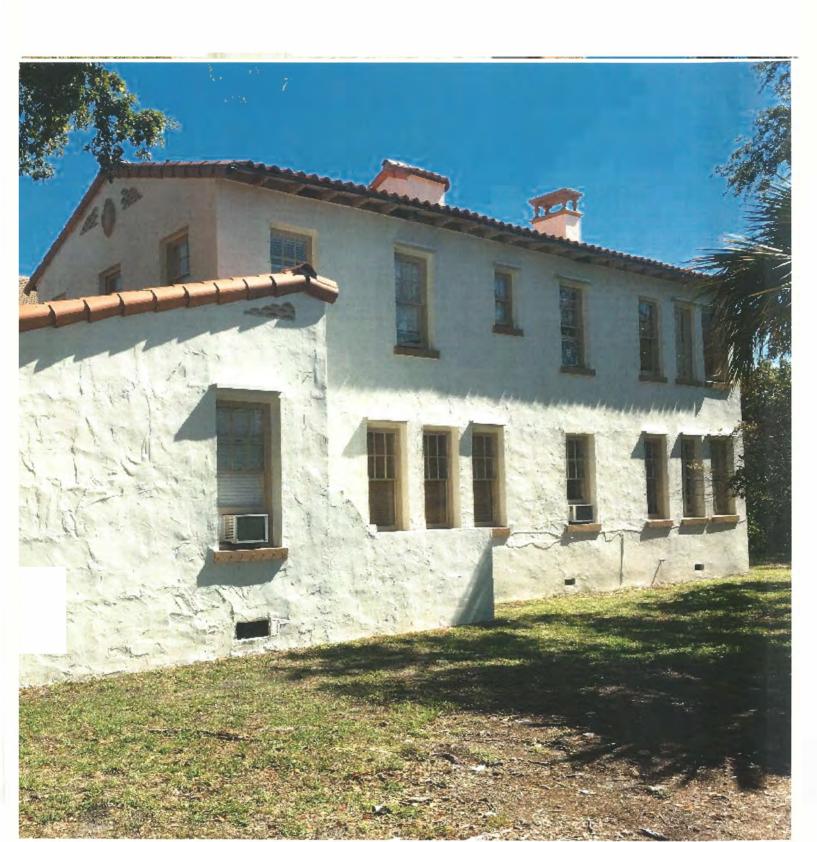

Sincerely,

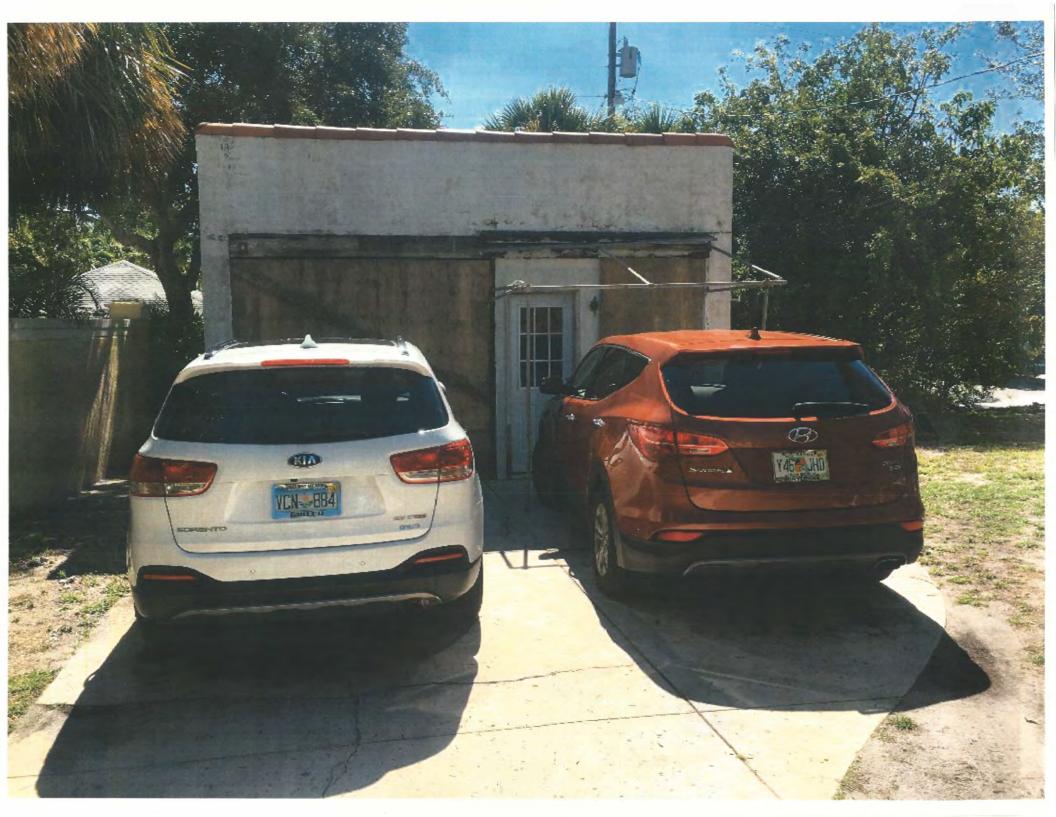

Allison E Turner Co-Owner of Property

Re: A Single-Family Residence

145 NE 6th Avenue Delray Beach, FL 33444 Our File No. 2190109.000

Dear Ms. Turner:

At your request, we have appraised the above referenced property. The purpose of this appraisal was to estimate the market value for the subject "in its current condition", "its value without the garage structure" and "market value with the garage as preserved and restored (replaced)". Our analysis does not address the possible use of the subject property for alternate commercial or mixed-use purposes as per instructions from Michelle Hoyland, Planner at the City of Delray Beach.

The date of the property inspection was March 26, 2019, which is the date of the inspection and photographs, as well as the effective date of this appraisal. The intended use of this report is for building code requirements for garage replacement for submittal to the City of Delray Beach.

As a result of our analysis, we have developed the following opinion that the market value of the subject in its "AS-IS" condition (as defined in the report), subject to the definitions, certifications and limiting conditions set forth in the attached report, as of March 26, 2019 was:

SEVEN HUNDRED NINETY THOUSAND DOLLARS (\$790,000)

As a result of our analysis, we have developed the following opinion that the market value of the subject **WITHOUT THE GARAGE STRUCTURE** (as defined in the report), subject to the definitions, certifications and limiting conditions set forth in the attached report, as of March 26, 2019 was:

EIGHT HUNDRED THOUSAND DOLLARS (\$800,000)

As a result of our analysis, we have developed the following opinion that the market value of the subject with **the garage as preserved and restored** (**replaced**) (as defined in the report), subject to the definitions, certifications and limiting conditions set forth in the attached report, as of March 26, 2019 was:

EIGHT HUNDRED FIFTY THOUSAND DOLLARS (\$850,000)

The following presents a summary appraisal report. This letter must remain attached to the report in order for the value opinion set forth to be considered valid. Your attention is directed to the Assumptions and Limiting Conditions within this report.

Respectfully submitted,

Borrower	N/A			
Property Address	145 NE 6th St			
City	Delray Beach	County Palm Beach	State FL	Zip Code 33444
Lender/Client	Ms Allison Turner			

• GP Residential: Subject - Legal Description

Lot 5, less the North 33.6' and less the West 5', Lot 6, less the West 5', and Lot 7, less the West 5' of Block 115 in the City of Delray Beach, according to the Plat of the Town of Linton now Delray Beach, in Plat Book 1, Page 3 of the Public Records of Palm Beach County, Florida.

Marketing and Exposure Times

Reasonable exposure time is the retrospective amount of time it would have taken the appraised property to sell in the market at the equivalent estimate of market value contained in this appraisal. Exposure time is inherent within the market sales utilized in the valuation. The subject is a large, custom dwelling and the data contained in the Sales Comparison Approach indicates exposure times for comparable properties were between 50-553 days, and a reasonable exposure time for the subject is 90-180 days.

We estimate a reasonable marketing time (the amount of time it would probably take to sell the appraised property at our estimate of market value if exposed for sale beginning on the date of this valuation) to be within 90-180 days.

Hypothetical Conditions

Hypothetical conditions are defined by the Uniform Standards of Professional Appraisal Practice as "...that which is contrary to what exists but is supposed for the purpose of analysis. Hypothetical conditions assume conditions contrary to known facts about physical, legal, or economic characteristics of the subject property; or about conditions external to the property, such as market conditions or trends; or about the integrity of data used in the analysis."

We have also been asked to provide three (3) values for the subject: its value in its current condition, its value without the garage structure, and market value with garage as preserved and restored (replaced), all as currently used for single family residential purposes.

• GP Residential: Sales Comparison Approach Analysis

The subject is located in a highly desirable location because it is within walking distance of the Intracoastal Waterway and Atlantic Avenue. However, the subject has not been updated and is in average overall condition. The subject's garage has been condemned and the owner intends to raze it. Additionally considered is the subject's frontage along a busy city surface street.

In order to conclude on three types of value for the subject, we have included three sales grids, utilizing the same three comparables, but adjusting them under different contexts to employ the Hypothetical Conditions as outlined above. Comparables 1, 2 and 3 illustrate a probable value for the subject in its "As-Is" condition. These comparables are adjusted downward for the features they have, as well as an additional deduction for the cost of demolishing the garage structure. Comparables 4, 5 and 6 illustrate a probably value for the subject using the Hypothetical Condition that the subject's garage and living space had been razed. Comparables 7, 8 and 9 reflect a probable value for the subject utilizing the Hypothetical Condition that the garage and living area had been repaired to a condition consistent with market expectations for the area.

The following addresses the adjustments applied to the comparable sales before adjustments are made based on the garage and living area.

The first element of consideration which demands adjustment is time. Comparable 3 is a dated sale and is adjusted upward 1% per month to accommodate increasing market conditions.

Comparables 1 and 2 have a similar traffic influence, while Comparables 3 and 4 do not front a busy, city street. These comparables are adjusted \$50,000 to accurately depict market reaction to a residential dwelling fronting a busy street.

Comparables 2 and 4 are CBS construction and are adjusted downward \$10 per square foot for being a higher quality material.

There has been one sale in the prior two years of a similar dwelling in similar condition to the subject (617 SE 5th St, \$655,000) however this property was significantly smaller than the subject and the property was purchased for land value. The structure has since been razed. Therefore, there are no comparables which have sold in similar condition as the subject and all of the Comparables are adjusted downward \$20 per square foot for condition.

Following condition adjustments, utility and size adjustments are applied. Bedroom adjustments are applied at \$20,000 per bedroom. Comparables with more bathrooms than the subject are adjusted downward \$10,000 for half-bathrooms and \$20,000 for full-bathrooms. This adjustments is applied to Comparables 1, 2, 3 and 4. Size adjustments are applied at \$120 per square foot for Comparables which deviate from the subject's size by more than 100 square feet.

All of the Comparables are also adjusted because they have central air conditioning systems.

Comparable 1 has a larger garage than the subject and Comparable 2 does not have a garage. These comparables are adjusted \$10,000 for each additional garage bay.

All of the comparables also have pools and are adjusted downward \$25,000.

Supplemental Addendum	File No. Turner
County Palm Beach	State FI Zip Code 33444

Scenario 1: "As-Is" Value

N/A

145 NE 6th St

Delray Beach

Ms. Allison Turner

Borrower Property Address

Lender/Client

City

In this scenario, the subject is valued in its "As-Is" condition, with a structure which is designed for use with a one-car garage and an additional 371 square feet of living area which has been condemned and is damaged beyond repair. It is appropriate to deduct the estimated cost to demolish this structure from the comparables. All of the comparables are adjusted downward \$10,000 for the cost to demolish the garage, and Comparable 3 is adjusted downward an additional \$40,000 because it has a 768 square foot guest cottage.

The resulting adjusted values range from \$708,800 to \$973,900. Given the subject's overall condition, a value toward the lower end of the range is appropriate and we conclude on an "AS-IS" VALUE OF \$790,000.

Scenario 2: No Garage

In the following line-item we are adjusting the comparables based on the Hypothetical Condition that the garage had been razed and no deduction for demolition is necessary. Under this scenario, only Comparable 6 is adjusted because it has a guest cottage.

The resulting adjusted values range from \$718,800 to \$983,900. Given the subject's overall condition, a value toward the lower end of the range is appropriate and we conclude on a VALUE WITHOUT THE GARAGE OF \$800,000.

Scenario 3: Repaired Garage

In this scenario, we employ the Hypothetical Condition that the garage had been repaired and brought to current code requirements and market expectations. We adjust the comparables based on the Hypothetical Condition that this structure contains a one-car garage and 371 square feet of living area, which could potentially be utilized as a guest house. In this case Comparables 1 and 2 are adjusted upward \$40,000, which is an appropriate contribution a guest house and garage would command in the subject's market. Comparable 3 is not adjusted because it also has a quest house.

The resulting adjusted values range from \$758,800 to \$1,023,900. In this situation, we assume that the garage and attached living area had been finished in a workman-like, quality manner consistent with current code requirements and market expectations for quality finishes. Given the subject's overall condition of the main house, and the assumed good condition of the guest house and associated garage, a value toward the lower end to middle of the range is appropriate and we conclude on a VALUE WITH THE REPAIRED GARAGE AND LIVING AREA OF \$850,000.

• GP Residential: Final Reconciliation

The purpose of reconciliation is to examine the strengths and weaknesses of each approach and determine which value estimate is most appropriate. Considering the nature of the appraised property, the availability of comparable data and the dollar amount of the indicated values, the range in value is acceptable. The Income Capitalization Approach is not applicable, nor necessary to produce credible results in this assignment as dwellings in the subject's market area are typically owner-occupied. The cost approach to value is also not applicable because the subject is an older dwelling and has not been developed.

The Sales Comparison Approach is considered a good indicator of value when there are recent sales of comparable properties available for analysis. In this instance, several sales were selected for analysis and they indicated a good range.

2018 ASSESSED VALUE AND TAXES:

Subject Property was assessed for a market value of \$714,025 with exemptions. The subject property has a gross real estate tax for 2018 of \$10,256.

CLIENT DISCLOSURE AND INTENDED USER:

This Appraisal Report is intended for use only by Business Consultants of South Florida and/or otherwise specified in writing. Use of this report by others is not intended by the appraiser.

PURPOSE OF REPORT:

The purpose of this Appraisal Report is to estimate the market value, fee simple estate of the subject property as of March 26, 2019 for building code requirements for garage replacement for submittal to the City of Delray Beach.

INTENDED USE OF THIS REPORT:

The intended use of this appraisal report is to provide the client with a supportable estimate of value for the subject property which can be utilized to establish a purchase or selling price. It may not be used or relied upon by any other party. Any party who uses or relies upon any information within this report, without the preparer's written consent, does so at their own risk.

SCOPE OF ASSIGNMENT:

Supplemental Addendum	File No. Turner				
County Palm Beach	State FL Zip Code 33444				

The traditional appraisal approaches include the cost approach, the sales comparison approach, and the income capitalization approach. We have considered all three approaches in this assignment, and found only the sales comparison approaches to be applicable. In the process of gathering data for the sales comparison approach to value, we conducted a search of our appraisal files and public information services such as the Palm Beach County Property Appraisers public access system and the Palm Beach County Clerks Office, as well as subscription based information sources such as Regional Multiple Listing Service and RealQuest.com for comparable sales in the relevant market area. We searched for the most similar sales to the subject property. The sales ultimately selected for further analysis were the best comparable sales we were able to find in the Palm Beach market. We obtained and verified additional information on the comparable properties with a party to the transaction, or a broker or agent of the parties when possible. We inspected the interior and exterior of the subject property and the exterior of the comparables. Physical data pertaining to the subject property was obtained from personal inspection of the interior and exterior, plat and public information sources. We make no warranty as to the authenticity and reliability of representations made by those with whom we verified sales, rental and other information. We have taken due care in attempting to verify the data utilized in this analysis. We based our analysis and conclusions on overall patterns rather than on specific representations.

This is an appraisal report in a form format.
