DELRAY BEACH WATER SUPPLY AND TREATMENT FEASIBILITY STUDY PRESENTATION

Recommended Action:

Presentation Only.

Background:

The City of Delray Beach engaged the services of Kimley Horn and Associates, Inc. (KHA) to perform a study for suggesting options to the City in meeting future water demands.

The study involved evaluation of the City's existing water supply and treatment facilities against projected demands and emerging regulations, to provide suggestions on treatment facilities in meeting future capacity.

The presentation will highlight the status of City's current water supply and treatment facilities, project future population and water supply demands, and then provide options for future treatment facilities with associated planning level costs.

City Attorney Review:
