Recommended Action:

Background:

The City is currently in the process of selecting a professional services firm to serve as its Owner's Representative in connection with the design and construction of the new water treatment plant. Amounts paid in connection with the planning, design and construction of the new plant will invariably qualify as "project expenditures" to be funded from the proceeds of a future revenue bond issue. Internal Revenue Service regulations require that, to reimburse expenditures made prior to the date of the financing, the City must make a formal declaration of reasonable intention to reimburse the expenditures with the proceeds of a borrowing (a "declaration of official intent") within sixty (60) days after the date the expenditure was paid. Staff is therefore requesting that the City Commission adopt the attached resolution indicating its official intent to reimburse project expenditures from the proceeds of the future bond issue.
